Common Transaction Reporting and Evidence Standard

An open, rail-neutral format for evidencing payment flows in regulated gambling

Item	Detail
Short name	CTRES v1.0 — universal edition
Status	Open draft for consultation with authorities and industry. An independent standard: it carries no regulatory force and creates no new obligations.
Date	2 October 2026 (Annex B revision v1.0.2, 13 October 2026)
Editor	Dmitry Skachko
Contact	hello@ctres.org
Website	https://ctres.org
Coverage	Every payment rail — cards, bank and instant payments, e-money, mobile money, vouchers, cash at retail, virtual assets — under any jurisdiction's rules, through jurisdiction profiles
Editions	This universal edition. A Curaçao edition (September 2026) applies the virtual-asset module to the CGA crypto policy guideline.
Licence to use	The text is licensed under Creative Commons Attribution 4.0 International (CC BY 4.0). Any operator, supplier or authority may implement the Standard without fee or permission. The schema and a reference validator for structural and referential checks are published under the Apache License 2.0 at github.com/ctres-standard. Governance is set out in §13.
Comments	Through the public issue tracker at github.com/ctres-standard/spec, or to hello@ctres.org. Every authority is invited to correct its own profile in Annex B; corrections an authority makes to its own profile are adopted as submitted.

CTRES v1.0 · Draft for consultation
ctres.org · hello@ctres.org

1. Purpose and status

1.1 The problem this Standard addresses

Every gambling regulator asks operators the same five questions about money. Did it come from the player? Was it checked before it was accepted? Was it credited correctly? Where did it go when it left? Is the money owed to players actually there? Each regulator asks in its own format, on its own calendar and through its own channel.

The research behind this version reviewed the published rules of sixty-seven jurisdictions on five continents (Annex B), from long-established online markets to markets that are opening, closed or still writing their rules. The questions are the same in all of them. What differs is a small set of parameters: which payment rails are permitted, at what amounts checks and reports are triggered, over what time window amounts are aggregated, how quickly a payout must be made, where data must be held, and for how long.

Three consequences follow from the absence of a common format:

- An operator licensed in several jurisdictions rebuilds the same evidence for each. In federal, provincial and entity systems — Argentina, Bosnia and Herzegovina, Canada, Nigeria, South Africa, the United States — the same facts arrive in as many shapes as there are licensing bodies.
- More than half of the jurisdictions reviewed run, or are building, a central system, data vault or state transaction register — from Italy, Spain, Denmark and Germany to Brazil, Colombia, Kazakhstan, Uzbekistan and Uganda. Each defines the operator-side data afresh, so every new connection is a bespoke integration.
- An operator that has implemented its controls well cannot prove it more cheaply than one that has not.

CTRES defines the shape of the evidence once and lets each jurisdiction set its own parameters.

1.2 What this Standard is not

- It creates no obligation. It formats evidence of duties that already exist under each jurisdiction’s law and licence conditions.
- It does not replace any authority’s central system, reporting portal or financial intelligence reporting schema, such as goAML, the FINTRAC reporting API, Infostat-UIF or SIGAP. It is the operator-side evidence layer from which those submissions can be produced (§7).
- It is independent of any authority. Every reference to a jurisdiction’s rules is a reading of published sources, offered to the authority concerned for review.
- It names no vendor and requires none.
- It does not cover game outcomes, wagering records beyond their reference, marketing data or behavioural analytics.

1.3 Relation to the Curaçao edition

The first edition of this Standard, prepared in September 2026, covered virtual assets only, under one jurisdiction’s crypto policy. This universal edition keeps its record model and makes three structural changes:

- Rail-neutral core. The record model describes any payment rail. Virtual assets become one rail module among seven (§6), and everything the Curaçao edition defined for them is kept.
- Jurisdiction profiles. Thresholds, windows, permitted rails, deadlines and retention periods are no longer written into the records; they are parameters of a profile (§5). Profiles for sixty-seven jurisdictions, researched from published sources, are in Annex B.
- Map, don’t replace. Each record carries the references that payment rails and regulators’ own systems issue, so a single source of truth can feed every submission (§7).

The full list of differences is in Annex F.

2. Scope

2.1 In scope

Licensed gambling operators — online and, where an authority so chooses, retail and land-based — and the payment providers acting for them, for the following:

CTRES v1.0 — open draft for consultation
ctres.org · hello@ctres.org

- Player deposits and withdrawals on any rail, and the payment instruments used.
- Every location where the operator holds money: player-funds accounts, operational and treasury accounts, provider balances, mobile money collection accounts, virtual-asset wallets and cash floats.
- Checks that precede the movement of money: identity and holder verification, sanctions, eligibility and exclusion registers, limits, source of funds, fraud and blockchain analytics.
- Taxes levied or withheld at the point of payment.
- Movements between the operator's own funds locations.
- Reconciliation of each funds location, and of total player liabilities against the funds held to cover them.
- Exceptions, incidents, and references to reports filed with other authorities.

2.2 Out of scope

Game and wager records, which are referenced but not reproduced; marketing and affiliate data; behavioural analytics; and the content of suspicious transaction reports, which remains under the confidentiality rules of each jurisdiction (§12).

3. Design principles

Principle	What it means in practice
No new obligations	The Standard formats evidence of duties that already exist. A field that cannot be traced to a requirement in at least one jurisdiction is optional.
Rail-neutral core, rail modules at the edge	Fields common to every rail live in the core records. Fields that exist on one rail only — a transaction hash, a card BIN, a mobile money receipt, a retail point identifier — live in a rail module (§6).
Jurisdiction as configuration	Thresholds, aggregation windows, deadlines, permitted rails and retention periods are profile parameters, never constants in the format. Records carry the raw facts needed to apply any profile.
Map, don't replace	Regulators keep their own channels and schemas. CTRES records carry the references those systems issue and can be transformed into their formats.
Evidence over assertion	A control is reported as the record it produced, with a timestamp and an actor, not as a statement that the control exists.
Computed, not declared	Where a fact can be derived from other records — a payout to the instrument that funded the account, a movement out of player funds, the time taken to report an incident — validation derives it instead of trusting a flag the operator sets.
Visible gaps	Where a control left no record, the field is reported as not_recorded rather than omitted, so that an absence of evidence is visible and is not mistaken for an export error.
Pseudonymous by default	Periodic submissions carry player references, masked account numbers and hashed phone numbers — never identity documents.
Proportionate	Three conformance levels let a small operator comply with files and a large one with an interface.
Deterministic and verifiable	The same inputs produce the same package. Every package carries a manifest with a hash per file and may carry a signature, so a submission can be proved unaltered.
Currency-aware	Amounts are decimal strings with an ISO 4217 code or an asset identifier, plus a reporting-currency value with its rate and source, so that thresholds in any currency can be applied. Thresholds set in indexed units — minimum wages, UMA, UIT, base units — are converted with the value in force on the transaction date, which the profile records.

4. Record model

Twelve record types. Each record is one line of JSON; each file holds one record type for one period. Core fields are listed below; rail-module fields are described in §6, and the complete catalogue is maintained as a machine-readable schema (Annex A), published at github.com/ctres-standard/schema.

ID	Record	The question it answers
R1	Funds Location	Where does the operator hold money, for what purpose, and under what protection?
R2	Payment Instrument Link	Does this instrument belong to this player, and may it receive payouts?
R3	Deposit	What came in, from which instrument, when was it credited, and what was

ID	Record	The question it answers
		checked first?
R4	Withdrawal	What went out, to which instrument, who released it, and how quickly?
R5	Check Decision	Which control ran, before which event, with what outcome?
R6	Internal Movement	Did money move between the operator's own locations, and was segregation kept?
R7	Reconciliation Statement	Do the books match the external statements, and are player liabilities covered?
R8	Exception	What could not be explained, for how much, for how long, and who owns it?
R9	Incident	What happened that an authority must be told, and when was it told?
R10	Provider Register	Who handles the money, under whose authorisation, after what due diligence?
R11	Provider Attestation	Where the operator cannot see the money directly, what does the provider certify?
R12	Report Reference	Which reports were filed elsewhere, triggered by which records, against which deadline?

4.1 R1 Funds Location

Every place the operator holds money, in any form. This is the record that answers segregation and protection requirements.

Field	Type	Req.	Purpose
location_id	string	M	Stable internal identifier
location_type	enum	M	bank_account | provider_balance | mobile_money_collection | emoney_account | crypto_wallet | cash_float
purpose_class	enum	M	player_funds | operational | treasury | tax_withheld | reserve_or_guarantee
provider_id	string	C	Institution holding the location, from R10
identifier_masked	string	M	Masked account number, paybill or short code, or wallet address
currency_or_asset	string	M	ISO 4217 code or asset identifier
protection_mechanism	enum	M	segregated_account | trust | separate_estate | guarantee | reserve | none
custody_model	enum	M	direct | omnibus_at_provider | hybrid — selects the reconciliation profile (§4.7)
controlling_entity	string	M	Legal entity that controls the location
location_jurisdiction	string	M	Country where the funds are held, for location rules
opened_at / closed_at	datetime	M/C	Lifecycle of the location in the inventory
ownership_evidence_ref	string	M	Reference to the proof of control held on file

4.2 R2 Payment Instrument Link

The link between a player and a payment instrument: whose it is, how that was established, and whether payouts may go to it. R2 is submitted as the full register at period end — every link ever made, including revoked ones with their status — and a player is identified by the pair player_ref_scope and player_ref, so that the same reference in two brands is never merged.

Field	Type	Req.	Purpose
instrument_id	string	M	Stable, tokenised identifier
player_ref / player_ref_scope	string	M	Pseudonymous player reference, and the brand or licence it belongs to
rail	enum	M	card | bank_transfer | emoney | mobile_money | carrier_billing | voucher | cash | virtual_asset
instrument_detail	object	M	Rail-module fields (§6): masked card, masked account number, instant-payment key type, hashed phone number, wallet address
funding_type	enum	C	debit | credit | prepaid | deferred | invoice | bnpl | unknown —

Field	Type	Req.	Purpose
			needed wherever credit in any form is prohibited
issuer_country	string	C	Country of the institution that issued the instrument — needed wherever only domestic instruments are permitted
holder_match	enum	M	match | partial | no_match | not_checked | not_available
holder_verification_method	enum	C	issuer_check | bank_name_check | open_banking | instant_payment_directory | mobile_operator_kyc | signed_message | micro_transfer | provider_attestation | document
verified_at / verified_by	datetime / string	C	When and by whom
national_id_match	enum	C	match | no_match | not_checked — where accounts must be held under the player's national identifier
payout_status	enum	M	not_eligible | pending | active | revoked

4.3 R3 Deposit and 4.4 R4 Withdrawal

The two records that carry the money. Both reference the instrument, the checks relied upon and the ledger entry, so that the payment, the decision and the player balance can be tied together without further enquiry.

Field	Type	Req.	Purpose
tx_id	string	M	Internal transaction identifier
player_ref / player_ref_scope	string	M	As in R2
direction	enum	M	deposit | withdrawal
rail / instrument_id	enum / string	M	Rail, and the R2 instrument used
provider_id	string	M	From R10
rail_reference / rail_reference_type	string / enum	M	The identifier the rail itself issued: acquirer reference, end-to-end instant-payment ID, mobile operator receipt, voucher serial or transaction hash
authority_reference	string	C	Identifier issued by an authority's central system, where one exists
amount / currency_or_asset	decimal / string	M	As transacted
amount_reporting_ccy / fx_rate / fx_source	decimal / string	M	Value used for thresholds, with the rate and its source
initiated_at / settled_at	datetime	M	When the payment was initiated, and when the rail settled it
credited_at	datetime	M	When the player account was credited or debited — the moment that prior checks must precede
account_currency / account_fx_rate	string / decimal	M/C	Currency of the player account, and the rate applied where it differs from the payment currency
credited_amount / ledger_entry_ref	decimal / string	M	Amount posted to the player account, in the account currency, and the ledger entry
fees	object	M	Rail, provider and network fees charged to the player, separated
operator_cost_reporting_ccy	decimal	O	Rail or network costs borne by the operator, in the reporting currency
tax_lines	array	C	Tax levied or withheld at this payment: type, rate, amount, authority, due date, remittance reference
check_ids	array	M	R5 decisions in force at the moment of crediting or dispatch
limit_check	enum	C	within_limit | blocked | reduced | not_applicable | not_recorded
outcome	enum	M	accepted | rejected | frozen | returned | pending_review
requested_at / paid_at	datetime	M	Withdrawals: measures payout time against the profile's deadline
destination_rule	enum	M	Withdrawals: same_instrument | same_holder_other_instrument | profile_route | exception — the closed-loop evidence
source_instrument_ids	array	C	Withdrawals: deposit instruments the payout is matched to

Field	Type	Req.	Purpose
approved_by / approved_at	string / datetime	M	Withdrawals: the person or rule that released the payment

4.5 R5 Check Decision

Any control that runs before money moves, recorded in a common vocabulary so that outcomes remain comparable across providers and registers. The Standard does not prescribe scoring.

Field	Type	Req.	Purpose
check_id	string	M	Identifier
subject_type / subject_ref	enum / string	M	player | instrument | transaction | address | provider
check_type	enum	M	identity | biometric | holder_match | sanctions | pep | eligibility_register | self_exclusion | limit | cross_operator_limit | credit_register | source_of_funds | financial_risk | fraud | blockchain_analytics | travel_rule
register_or_provider / version	string	M	The register, list or provider consulted
performed_by_party	enum	M	operator | provider | authority_system | other
performed_at	datetime	M	Must precede crediting or dispatch wherever the profile requires a prior check
result_class	enum	M	clear | low | medium | high | prohibited | match | no_match | error
decision	enum	M	allow | step_up | block | freeze | return | refer
decided_by	enum	M	automated | analyst
supersedes	string	C	Earlier decision this one replaces, for example a step-up followed by allow
evidence_ref	string	M	Where the underlying report is retained

4.6 R6 Internal Movement

Movements between the operator's own funds locations — settlement from a provider to a bank, sweeps, tax remittance accounts — which is where segregation either holds or breaks. Fields: movement identifier; source and destination locations, at least one of which must exist in R1 — the other may be a provider from R10, such as an exchange or a settlement account; purpose (settlement | sweep | liquidity | conversion | tax_remittance | correction); whether the movement crosses purpose classes, with a justification where it does; approver and time; rail reference; amount and fees.

4.7 R7 Reconciliation Statement

Two kinds of statement turn reconciliation from a claim into a number.

- Location statement — one per funds location per period. Opening and closing balances from the external source (bank statement, provider settlement report, mobile operator statement or chain) and from the ledger, plus the provider's own reported balances where the custody model is omnibus; inflows, outflows and fees; the unexplained delta, stated rather than hidden; exceptions raised; preparer and reviewer.
- Coverage statement — one per licence per period, or per day where the profile requires. Player balances, pending withdrawals and, where the profile counts them, open bets, giving total player liabilities; funds held against them by protection mechanism; funds in transit; any shortfall, and when it was cured.

The custody model declared in R1 selects the reconciliation profile. Applying a direct-custody profile to a pooled arrangement produces an exception on every transaction and tells the reader nothing.

Custody model	What the operator can evidence	Reconciliation profile
Direct — the operator holds the account, wallet or float	Every payment exists in an external statement against a location in R1	Statement against ledger, per location and per period; the unexplained delta is the residual
Omnibus at a provider — player money sits in a payment provider's, mobile money operator's or virtual-asset provider's pooled account	Provider records and references; the provider's own balance in aggregate	Two loops: ledger against provider records by reference, and provider balance against the R11 attestation

CTRES v1.0 — Draft for consultation
ctres.org — hello@ctres.org

Custody model	What the operator can evidence	Reconciliation profile
Hybrid — collection through a provider, funds then swept to the operator	Both of the above, on different locations	Applied per location; the package carries both

4.8 R8 Exception

Anything the operator could not explain, in a common vocabulary, with a value, an age and an owner. A supervisor rarely needs the whole ledger, but always needs the list of things that did not reconcile. Fields: identifier, category, when and by what process it was raised, related records, amount, status (open | under_review | resolved | accepted_risk), age in days, resolution, owner.

Categories are drawn from a closed list, which includes at least: external movement without a ledger entry; ledger entry without an external movement; amount mismatch; check missing or performed after crediting; payout to an instrument not eligible for payouts; payout outside the closed-loop rule without justification; holder mismatch; credit-funded instrument where credit is prohibited; payout later than the profile deadline; movement across purpose classes without justification; location outside the inventory; provider without due diligence or authorisation; coverage shortfall; tax withheld but not remitted by its due date.

4.9 R9 Incident and 4.10 R10 Provider Register

R9 carries events an authority must be told about, with the deadline clock set by the profile: incident identifier, category, detected and notified times, the deadline that applied, the authority and channel used, related records and status.

R10 records each provider that handles player money — acquirer, bank, payment service provider, e-money institution, mobile money operator, voucher issuer, virtual-asset service provider or cash agent — with the authority that authorised it and the licence reference, whether the gambling regulator was notified of or approved it where the profile requires, the dates of due diligence and next review, where its data is held, and, for virtual-asset providers, Travel Rule capability.

4.11 R11 Provider Attestation

Where money sits in a provider's pooled account, the operator cannot evidence individual movements from its own statements. R11 is the provider's statement standing in their place: the period covered, the balance held for the operator, totals credited and debited, the reference scheme that links the provider's records to the operator's, and a signature. It applies equally to a card acquirer's reserve, a mobile money collection account, an e-money balance and a virtual-asset provider's pooled wallet. An operator whose provider will not supply R11 has not failed this Standard; it has discovered a control it cannot evidence, and reporting that plainly is more useful than reporting a reconciliation that was never possible.

4.12 R12 Report Reference

A link between CTRES records and reports filed with other authorities: suspicious transaction reports, cash and virtual-currency threshold reports, casino disbursement reports, periodic systematic reports, tax remittances and regulator notifications. Fields: reference identifier; report type; destination authority; channel (goAML, a national reporting API, a regulator portal or other); the profile rule that triggered it; related records; deadline; time filed; the receipt the destination issued.

R12 never carries the content of a suspicious transaction report. Where tipping-off and confidentiality rules apply, R12 is held by the operator and disclosed only to an authority entitled by law to see it; periodic packages then carry counts and timeliness only.

5. Jurisdiction profiles

A profile is a short configuration, in the machine-readable structure defined by the schema (Annex A), that turns the neutral record model into one authority's rule set. It contains parameters only and never adds fields. The table lists the parameters, with examples drawn from the profiles in Annex B.

Parameter	Examples from Annex B
Permitted rails and instrument types	Credit cards prohibited (United Kingdom, Ireland, Belgium, Brazil); credit in any form, including invoice and buy-now-pay-later (Sweden); virtual assets permitted with conditions (Malta, Isle of Man, Curaçao, Estonia) or not accepted (Italy,

CTRES v1.0 — Draft for consultation
ctres.org/feedback

Parameter	Examples from Annex B
	Greece, Germany, Brazil, Peru, Ontario)
Holder and ownership rules	Instruments in the player's name (Italy, Greece, Brazil, Buenos Aires Province); ownership confirmed above set amounts (Greece: deposits from €5,000, withdrawals from €800)
Closed loop and payout routing	Withdrawal to the account used to deposit (Buenos Aires Province; planned in Ireland); payout route set by amount (Kenya)
Check thresholds and aggregation windows	€2,000 (most EU jurisdictions), €3,000 over 30 days (Isle of Man), NAf 4,000 (Curaçao), AED 11,000 (United Arab Emirates); rolling 180 days (Malta); fixed 24-hour window (Canada); gaming day (United States, Curaçao); lifetime deposits (Alderney); indexed units (Mexico, Peru, Argentina)
Report triggers and deadlines	Cash from R49,999.99 within 3 days (South Africa); from C$10,000 under the 24-hour rule (Canada); suspicious reports from 24 hours (Nigeria) to 15 days (South Africa)
Payout time limits	120 minutes (Brazil); 48 hours (Buenos Aires Province); 5 working days (Malta, Gibraltar)
Taxes at the point of payment	Excise on deposits and withholding on winnings (Kenya); withholding on winnings (Malawi, Lagos, Uganda), at rates that differ by product (Tanzania); withholding on withdrawals (Georgia)
Player-funds protection and coverage	At least 90% of liabilities in the account plus funds in transit (Malta); shortfall cured within 3 business days (Greece); separate estate covering balances and open bets (Brazil)
Submission mode and cadence	Real-time central system (Italy, Greece, Bulgaria, Serbia, Kenya); hourly financial summaries (Portugal); daily and monthly files (Brazil, Spain); monthly player-funds report (Malta); quarterly returns (United Kingdom, Gibraltar)
Cross-operator limits and registers	Real-time query to a central limit file before each deposit (Germany: €1,000 a month); weekly cap per operator, raised only after a credit-register check (Belgium); per-player monthly limits in a state register (Kazakhstan, Uzbekistan)
Eligibility screening at payment	Self-exclusion registers (Denmark, Sweden, Netherlands, Germany, Spain and many others); insolvency and benefit recipients (Czech Republic); debtors (Kazakhstan); welfare recipients (Brazil); minimum age of 25 (Georgia, Uganda); biometric check on each stake and payout claim (Ghana)
Mandatory hubs and gateways	Payments or bets that must pass through a state register or gateway (Uzbekistan, Kazakhstan; planned in Uganda), with a unique identifier per transaction (Ukraine)
Instrument origin and currency	Domestic banks or cards only (Ukraine, Armenia, Uzbekistan); a single settlement currency (Montenegro, Georgia, Angola, Colombia); one nominated account per player (Tanzania, Ukraine)
Withdrawal conditions	Share of deposits wagered before withdrawal and withdrawals per day (Colombia); winnings-only withdrawal and return of dormant balances (Croatia); cash payout of online winnings at a venue (Lithuania)
Payment-blocking lists	Lists that bind payment providers by operator or domain (Romania, Poland, Lithuania, Kazakhstan), by bank account (Czech Republic), by merchant category (Norway, Armenia), or for a whole category of games (India)
Data vault and integrity	Operator-hosted vault in the regulator's schema (Netherlands, Denmark, Spain, Germany, Romania), sealed daily with a regulator-issued token (Denmark), or pulled through a national data-exchange layer (Estonia)
Data location	Tier-IV data centre in Curaçao; European Economic Area (Italy, Greece); Nigeria from 2027
Retention	5 years in most jurisdictions; 7 years (Kenya, Malawi, Portugal); 10 years (Argentina, Serbia, Switzerland, Mexico; Italy, Greece, Spain and New Jersey for some records); tied to the tax limitation period (Bulgaria, Peru)

Profiles carry effective dates, so a new rule, a market opening or a change of regulator becomes a new profile version rather than an edit — Finland's licensing from July 2027 and Latvia's transfer of supervision to its tax authority are examples. Where a market is closed to online gambling, as in India and Kosovo, the profile covers payment-side blocking only.

Profiles belong to the authorities. The editor publishes a profile as confirmed only when the authority concerned has reviewed it; until then it is marked as researched from published sources, as every profile in Annex B is today. Where a federal or provincial system has several licensing bodies, a profile may inherit from a shared base and override only what differs, so that provinces or states agree the common part once.

6. Rail modules

Each rail adds the identifiers it naturally carries and the external evidence it naturally produces. A jurisdiction that does not permit a rail leaves it out of its profile; nothing else changes.

Rail	Identifiers carried	Holder verification typically available	External evidence for reconciliation
Card	Tokenised card number, BIN, last four digits, funding type, acquirer reference	Issuer name check where offered; strong customer authentication	Acquirer settlement reports
Bank transfer and instant payments (e.g. SEPA, Pix, TED, Interac, CBU/CVU, EFT)	Masked account number, instant-payment key type, end-to-end identifier	Account-name or national-ID check against the bank or directory; open banking	Bank statements; instant-payment confirmations
E-money and e-wallets	Wallet account identifier, funding-source type	Provider identity attestation; funding-source disclosure	Provider statements
Mobile money and carrier billing	Hashed phone number, pay-bill or short code, operator receipt or billing reference	Registered-name check with the mobile operator	Mobile operator statements; tax-integration records where they exist
Vouchers and prepaid	Voucher serial, issuer, point of sale	None at purchase; holder established at redemption	Issuer redemption reports
Cash at retail or venue	Retail point or cage identifier, cashier, receipt	Identity at the counter	Till and float reconciliations
Virtual assets	Chain, asset, transaction hash, address, confirmations, counterparty type, wallet temperature, off-chain flag	Signed message, micro-transfer, provider attestation, Travel Rule data	On-chain data; provider attestations (R11)

The virtual-asset module carries forward everything in the Curaçao edition: wallet purpose classes and temperature, key-control models, same-asset and same-wallet withdrawals, blockchain analytics as a check type, and custody models for pooled provider wallets.

7. Mapping to existing regulatory formats

CTRES does not compete with the formats authorities already receive. It is the source those submissions are produced from, and the place an authority can look when a submission raises a question.

Destination	What it receives today	CTRES source
Financial intelligence units (goAML and national equivalents)	Suspicious and threshold reports in the unit's own schema	R3, R4 and R5 populate transactions and parties; profile windows drive aggregation; R12 keeps the receipt
FINTRAC (Canada)	Large cash, large virtual currency, casino disbursement and suspicious transaction reports through a JSON API	R3 and R4 with the 24-hour rule applied by the profile; R12 keeps the receipt
SIGAP (Brazil)	Signed XML files, daily and monthly	R3 and R4 feed the wallet-movement files; R12 keeps the file receipts
Central control systems (e.g. Italy, Greece, Bulgaria, Serbia, Ukraine, Kenya)	Transaction data in real time, in the authority's protocol	authority_reference on R3 and R4 links each payment to the code the central system issued
Data vaults and safe servers (e.g. Netherlands, Denmark, Germany, Spain, Romania)	Account and transaction records in the authority's schema, XML or JSON	R3 and R4 map to the vault's payment records; R12 keeps the seal or upload receipt
Central limit files, registers and state hubs (e.g. Germany, Czech Republic, Kazakhstan, Uzbekistan)	A query before each deposit or bet, and the hub's transaction identifier	R5 records each query and response, performed by the authority system; authority_reference carries the hub identifier
Tax-authority feeds (e.g. Mexico, Kenya, Uganda, Ghana)	Transactions and taxes, in real time or daily	tax_lines on R3 and R4; R12 keeps remittance receipts
Player-funds reporting (e.g. Malta's monthly report; annual agreed-upon procedures in	Balances, liabilities and supporting statements	R7 coverage statement, with evidence references

CTRES v1.0 · Draft for consultation · ctres.org · hello@ctres.org

Destination	What it receives today	CTRES source
several jurisdictions)		
Periodic regulatory returns (e.g. United Kingdom, Gibraltar)	Aggregated figures	Derived from R3, R4 and R7

The mappings above are indicative. Detailed mappings are maintained separately from this Standard, versioned, and tested against the destination's own schema wherever that schema is public.

8. Submission and access

8.1 Modes

The profile chooses the mode. None of them adds a channel.

Mode	When	Contents
Continuous	Where the authority runs a central system or requires real-time access	Records are generated as events occur. The authority's system remains the channel; CTRES is the operator-side source and audit trail.
Periodic package	On the profile's cadence — monthly, quarterly or semi-annual	R1, R7, R8, R10 and R11, with the conformance declaration; R2 to R6 as a full extract or a sample, as the profile sets
On demand	Within the profile's deadline for information requests	The evidence pack (§9), per player, per transaction or per period
Incident	Within the profile's incident deadline	R9, with the affected records referenced by identifier

8.2 Formats and integrity

- JSON Lines, UTF-8, one record per line, one record type per file. A CSV profile with identical field names is permitted at Level 1.
- Timestamps in ISO 8601 with an explicit offset. Amounts as decimal strings, never floating point. Currencies as ISO 4217 codes; virtual assets by chain and contract.
- Every package carries manifest.json: licence, profile identifier and version, period, record counts, a SHA-256 hash per file, and the generating software and version. The SHA-256 of manifest.json is the package fingerprint: a receipt that quotes it proves which package was submitted. The manifest may be signed with the operator's certificate where the profile requires.
- Corrections are submitted as a new package that supersedes an earlier one by identifier and reason, so that the record of what was known when is preserved.

8.3 Transport and location

Through the authority's existing channel. Periodic packages are pseudonymous, so a package seen in transit reveals no player identity. Data location follows the profile. The Standard proposes no new channel and moves no data across borders.

9. Evidence pack

The pack answers a single supervisory question on any rail: show me this money, end to end. It is assembled from records already defined and contains, for one deposit and the withdrawal that followed it:

- The player reference, verification status and the level of due diligence applied at the relevant threshold.
- The deposit: rail, instrument, holder-match result, amount, rail reference and any authority reference.
- The checks that preceded crediting, with timestamps that prove the order.
- The crediting entry, and any difference from the amount received, with its reason.
- Taxes levied at the payment and their remittance.
- The withdrawal: destination, closed-loop result, checks, approver, and the times requested and paid.
- The location and coverage statements for the period, any exception referencing the transaction, and any report reference the requester is entitled to see.

CTRES v1.0 — open draft for consultation — ctres.org/v1.0

An auditor can sample directly from these packs. An operator that can produce them in minutes rather than weeks has reduced the cost of its own audit — the commercial reason to adopt the Standard, irrespective of supervision.

10. Conformance levels

Level	Requirement	Typical operator
Level 1 — Records	Every record type applicable under the operator's profile can be produced on request, within the profile's deadline, in CSV or JSON, with a manifest.	Small operator; manual assembly permitted
Level 2 — Structured	Periodic packages are submitted on the profile's cadence in the defined format and pass structural and referential validation.	Most operators
Level 3 — Continuous	Records are generated as events occur, exceptions are tracked to closure with ageing, and the authority may pull a period on request.	Large or multi-licence operator; operators connected to a central system

An operator declares its level in the conformance statement at Annex D, signed by the responsible officer.

11. Validation

A format helps only if conformance can be checked mechanically. Validation is defined here by class, not by rule, so that rules can evolve without reopening the Standard.

Class	Question it answers	Examples
Structural	Is the package well formed?	Required fields present; types and enumerations valid; manifest hashes match the files
Referential	Does the package hold together?	Every payment references an instrument in R2 and a provider in R10; every check reference resolves; each transfer is booked once; statement totals agree with the records behind them
Profile conformance	Does the evidence show the control operated under this jurisdiction's rules?	Checks precede crediting; payouts follow the profile's closed-loop rule or carry a justification; no credit-funded instrument where credit is prohibited; payout times within the profile's deadline; coverage at or above the required level
Completeness	Is anything missing that should be there?	External movements on inventory locations that appear in no record; rail references the external source does not confirm; funding instruments missing from R2; periods with no statement; differences no exception owns; exceptions open beyond their ageing limit

The catalogue of individual checks, their severities, the tolerances that separate a rounding difference from a discrepancy, and the materiality thresholds that make an exception reportable are deliberately not fixed in this Standard. They belong to each authority to set, and they will change more often than the format. They are maintained separately as a versioned conformance suite, so that a package can be tested against a named suite version and a named profile version, and the result reproduced later.

Wherever an independent source exists — the chain for virtual assets, bank and provider statements, an authority's own central system — completeness is checked against that source and not only against the operator's account of it.

An open reference validator for the Structural and Referential classes, validator-lite, is published under the Apache License 2.0 at github.com/ctres-standard/validator-lite. Validation under the Profile conformance and Completeness classes depends on the parameters this section leaves to each authority and is provided separately. No validator is a condition of using this Standard; an implementation validated by any other means is equally conformant.

12. Data protection, confidentiality and retention

- Periodic packages carry pseudonymous player references, masked account numbers and hashed phone numbers. Names, addresses and identity documents are not included.
- Identity data is provided only in an evidence pack answering a specific lawful request, and travels under the same arrangements as existing regulatory correspondence.

- Retention follows the profile. An operator licensed in several jurisdictions retains for the longest period that applies.
- Suspicious-report confidentiality is preserved: R12 holds references only and is disclosed only to authorities entitled to see it (§4.12).
- Data location follows the profile.
- Virtual-asset addresses are public by nature; the link between an address and a player is not, and is treated as personal data throughout.

13. Governance and versioning

Element	Arrangement
Editor	Dmitry Skachko. Maintains the text, the schema, the register of profiles and the conformance suite, and publishes versions.
Authorities	Own their profiles. Corrections an authority makes to its own profile are adopted as submitted.
Contributors	Operators, suppliers, auditors and associations comment through the public issue tracker at github.com/ctres-standard/spec or to hello@ctres.org. Substantive changes are published for comment before adoption.
Versioning	Major versions change the record model; minor versions add fields, rails or profiles; patches correct text. Profiles, mapping files and the conformance suite are versioned separately.
Licence	The text is licensed under CC BY 4.0. The schema (record types R1–R12, the package manifest and the structure of a jurisdiction profile) and the reference validator for the Structural and Referential classes (§11) are licensed under the Apache License 2.0. Profiles are published in human-readable form in Annex B. Anyone may implement the Standard without fee or permission.
Conformance claims	“CTRES Conformant” describes an implementation tested against a named conformance suite version. A claim states the suite and profile versions it was tested against.
Working group	The editor proposes to convene a working group of authorities and practitioners once at least three authorities have reviewed their profiles.

14. Roadmap

When	Step	Who
Q4 2026	Authorities review their profiles; corrections adopted as submitted	Authorities, editor
Q1 2027	Pilots with volunteer operators across at least three rail mixes: cards and bank transfers; mobile money; virtual assets	Operators, editor
Q2 2027	Version 1.1 with confirmed profiles, versioned mappings to existing formats, and the conformance suite versioned alongside	Editor
From July 2027	Alignment review as the EU Anti-Money Laundering Regulation (EU) 2024/1624 begins to apply	Editor, with EU authorities

15. Questions for authorities

Each answer changes the Standard materially.

- Is the profile for your jurisdiction in Annex B correct, and what is missing?
- Which rails do you expect to permit, restrict or review over the next two years — in particular virtual assets and new instant-payment schemes?
- Would a common operator-side format reduce the cost of connecting operators to your central system or reporting channel?
- Which submission mode fits your supervision: continuous, periodic package, on demand, or a mix?
- Which holder-verification methods do you accept as evidence that an instrument belongs to the player?
- Where player money sits in a provider’s pooled account — a payment provider, mobile money operator or virtual-asset provider — does a provider attestation (R11) satisfy you, or do you expect the operator to evidence it directly?
- Should report references (R12) be visible to you in periodic packages, as counts only, or not at all?

- For federal and provincial systems: would licensing bodies accept a shared base profile with local overrides?
- If you run a central register, hub or data vault, would you publish its schema, so that a mapping file can be maintained and tested against it?
- May operators refer to this Standard, in the policies and procedures they file with you, as the format in which they will evidence their controls?

Annex A. Field catalogue

The extracts in §4 and §6 are sufficient to build a working implementation of every record type. The complete catalogue adds formats, enumerations, conditional requirements and examples for each field, together with the profile schema. It is maintained as a versioned machine-readable schema — JSON Schema for record types R1–R12, the package manifest and the structure of a jurisdiction profile — published under the Apache License 2.0 at github.com/ctres-standard/schema, so that implementations can be tested automatically rather than read.

CTRES v1.0 · Draft for consultation
ctres.org · hello@ctres.org

Annex B. Jurisdiction profiles

Readings of published sources as at 2 October 2026, re-verified against the primary instruments and updated 13 October 2026 (release v1.0.2), summarised to the parameters in §5 and grouped by region. They are a reference, not legal advice. “Not found” means that no published rule was located, not that none exists. Each row is offered to the authority concerned for review, and a corrected row replaces this one as submitted; rows marked reviewed carry the authority’s own wording.

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Europe					
United Kingdom — Gambling Commission (Gambling Act 2005; LCCP; RTS), also the AML supervisory authority for casinos, remote included (MLR 2017 reg 7(1)(d)); National Crime Agency (UKFIU) receives suspicious activity reports (POCA 2002 Part 7).	Credit cards banned from 14 April 2020, also via a money service business (LCCP 6.1.2); e-wallets not loaded from a credit card (guidance). Payment services only via authorised PSPs (LCCP 5.1.2). Virtual assets not prohibited; 'digital currencies' are cash equivalents (LCCP 5.1.1); crypto High risk (2026 risk assessment); Commission exploring a route (May 2026); no licensee acceptance found.	No closed-loop rule found (LCCP, RTS, AML guidance searched); 'lack of closed-loop system' and payment methods not in the customer's name rated High risk (2026 risk assessment). Identity verified before gambling (LCCP 17.1.1). Limit prompt at registration or first deposit, limit the default (RTS 12A, 12E, from 31 Oct 2025); gross deposit limits per 24 h, 7 days, month (RTS 12B, from 30 Sep 2026).	Casino CDD at £2,000 (MLR reg 27(5); sterling from 30 June 2026 by SI 2026/621, was EUR 2,000), deposits and withdrawals. Vulnerability check when deposits minus withdrawals exceed £150 in 30 days (SR 3.4.4, from 28 Feb 2025). Staged financial risk assessments announced July 2026 (stage one £5,000 net in 24 h; no start date). SARs to the NCA (POCA 2002). Slots stake £5, £2 under 25 (SI 2025/215).	Remote licensees hold customer funds in a separate client bank account (LCCP 4.1.1). Insolvency protection rating disclosed in terms and acknowledged at first deposit: not protected (segregation only is the remote minimum), medium, high (LCCP 4.2.1; Commission ratings system). 'Not protected' customers reminded every six months, stating the value held (LCCP 4.2.1(3), from 31 Oct 2025).	Quarterly regulatory returns within 28 days of quarter end (LCCP 15.3.1; all operators from 1 July 2024). Key events within 5 working days, incl. POCA disclosures, banking, payment methods and processors (LCCP 15.2.1); MLR breaches as soon as practicable (15.2.3). AML records 5 years after the relationship ends (MLR reg 40(3), casinos). Complaints: ADR after 8 weeks, free (SR 6.1.1).
Ireland — Gambling Regulatory Authority of Ireland (GRAI; Gambling Regulation Act 2024 Part 2; from 5 March 2025). AML supervisor of gambling service providers: Minister for Justice (AML Compliance Unit), CJA (ML/TF) Act 2010; GRA 2024 s. 230 (GRAI role) not commenced. STRs to FIU Ireland and Revenue (CJA s. 42). GRAI betting licences from 9 Feb 2026; Betting Act 1931 licences run to expiry (s. 235).	Credit cards, credit facilities and e-/digital payments loaded from a credit card prohibited (GRA 2024 s. 165, in force 5 Feb 2026, S.I. 31/2026); Authority may bar other payment forms by regulations (s. 165(3)); none found. BNPL guidance not found. Virtual assets not addressed in the Act; Dept of Finance NRA 2026 action plan: GRAI standard on crypto as a source of funds by Q2 2027 (policy).	Closed loop: NRA 2026 plan, Q2 2027; not law. No own-name payment rule found. ID and age verified before account opening (s. 169; S.I. 315/2026). Limit facility; excess refunded within 7 days (s. 164). Deposit caps by regulations (s. 170); none. Winnings not unreasonably withheld, no deadline (s. 155). Balance refunded on closure (s. 171). Exclusion Register refund in 7 days (s. 45; not in force).	CDD before an occasional transaction of EUR 2,000 or more in aggregate, money paid to or by the provider, single or linked transactions (CJA 2010 s. 24(1), s. 33(1)(b); S.I. 487/2018 reg 4 for providers of gambling services; private members' clubs s. 25(1)(h)). STRs as soon as practicable to FIU Ireland (goAML Web) and to the Revenue Commissioners (ROS) (CJA s. 42).	B2C licensees must hold relevant funds (account-holder money, pending payments, unpaid winnings) in a single Segregated Customer Account at a regulated financial service provider, accessed only in listed cases (GRA 2024 s. 135, in force 5 Feb 2026). Authority may prescribe account type, records, retention, audit, deficit make-good (s. 136); none found. s. 152 records power excludes these accounts.	Authority may prescribe records and accounts and their form (s. 152); none found; no 2026 record-keeping consultation found on grai.ie. Account-holder register: name, address, date of birth (s. 168). Alerts on wins, losses, time at set intervals; balance and amounts paid viewable (s. 173); none prescribed. AML records 5 years after relationship or last transaction; Garda may add 5 (CJA s. 55).
Gibraltar — Gambling Commissioner	No credit for gaming. No published policy on virtual assets; the Gambling Act 2025 includes crypto currencies in “money’s worth”; DLT businesses are licensed separately by the GFSC.	Payments to and from a bank account in the customer’s name; enhanced due diligence for every new depositing customer. Withdrawals within 5 working days of verification.	Suspicious activity reports to the GFIU through Themis; Commissioner notified within 24 hours of suspected money laundering.	Liabilities separately identifiable and covered by cash or equivalents.	Quarterly statistical and financial returns; annual AML survey. Retention 5 years.

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Isle of Man — Gambling Supervision Commission (GSC) licenses under the Online Gambling Regulation Act 2001 and supervises AML/CFT under the Gambling (AML/CFT) Act 2018 and Code 2019; disclosures to the Isle of Man FIU. Gambling Legislation (Amendment) Bill 2026 passed Tynwald 28 April 2026; Royal Assent and commencement not confirmed at 8 October 2026.	No credit-card ban found; GSC approves every payment method in the operator's payment schematic; no cash for online gambling (Code 2019 para 29(1)). Virtual currency allowed since 1 January 2017 (Online Gambling (Amendments) Regulations 2016, deposits in money's worth) under five GSC pre-approved models (Licensing Requirements, October 2025); crypto in, fiat out not permitted.	Same coin in, same coin out (BTC in, BTC out). Online winnings paid only to a card account or other facility from which the customer previously deposited and which the operator is satisfied still belongs exclusively to the customer, or to a facility the operator is satisfied will reach the customer exclusively (Code 2019 para 29(2)). Payout deadline: not found.	Identification at account opening (Code 2019 para 10); verification before a deposit or withdrawal that takes the customer over EUR 3,000 (or equivalent) in 30 days, or EUR 3,000 in single or linked occasional transactions (para 11); virtual assets valued in EUR at transaction time. Disclosures to the Isle of Man FIU through Themis as soon as practicable (paras 22-24).	Participants' money paid into a client account at a recognised bank (Isle of Man licensed or Treasury-listed overseas deposit taker) and held on trust (Participants' Money Regulations 2010 regs 3, 4, 6); GSC expects an Isle of Man bank unless it gives prior written approval. Bank guarantee, trust, insurance or cash-market funds also accepted; cover equals deposits, unpaid winnings and bonuses.	Player registration and gameplay servers in the Isle of Man (software-only suppliers excepted). Quarterly return to the GSC by the 21st after quarter end (player fund cover, SARs, deposits and withdrawals by fiat, VC and VG). Retention 5 years from the transaction or end of relationship, even after the licence ends; transaction logs backed up daily. No central self-exclusion register found.
Alderney — Alderney Gambling Control Commission	Card rules not found. Cash may never be accepted from a customer (eGambling Regulations 2009, regs 4 and 6). Virtual assets reportedly not permitted (to be confirmed).	Additions to customer funds governed by the eGambling Regulations 2009 (reg. 232); same-method rule not found.	Due diligence when a customer's total deposits first reach €3,000 (Schedule 4, as amended from 1 January 2026). Suspicious reports to the Guernsey FIU through Themis.	Category 1 licensees keep customer balances in a separate bank account held solely for that purpose; cash above player balances.	Retention 5 years.
Malta — Malta Gaming Authority (Gaming Act, Cap. 583, Art 5; binding instruments under Art 7(2)); Financial Intelligence Analysis Unit (FIAU) receives suspicious transaction reports and supervises AML/CFT (Prevention of Money Laundering Act, Cap. 373, Arts 15-16, 26; PMLFTR, S.L. 373.01). FIAU Implementing Procedures Part II for remote gaming issued with the MGA.	Payments only via payment providers notified to the MGA and not objected to (Directive 3 of 2018, Art 45); new payment methods notified within 30 days (Art 37). No credit (Directive 2, Art 27). Virtual financial assets only with prior MGA approval (DLT Policy, Jan 2023); VFAs with inbuilt anonymisation functions prohibited; third-party wallet or exchange providers, if used, VFA Act authorised.	Withdrawals 'where possible' to the account the funds came from, otherwise to the player in line with AML law (Directive 2, Art 29(2)); paid within 5 working days 'if practicable' (Art 29(1)); time allowed for identity checks and CDD (Art 29(3)); AML or fraud delay or block (Art 30(2)); any withdrawal limit at least EUR 250 a month, deposits never restricted (Art 30(1)). No same-name rule found.	CDD when transactions reach EUR 2,000 (PMLFTR, S.L. 373.01, reg 9(1)). FIAU Implementing Procedures Part II: counted on deposits only, either daily since the relationship began or over a rolling 180 days; CDD not completed within 30 days of the threshold ends the relationship. STRs to the FIAU via goAML (reg 15); transaction held 1 working day after filing. No large-transaction report found.	Distinct patrimony, segregated, no creditor claim (S.L. 583.08, regs 4, 6, 7; Directive 2, Art 37). Held at an MGA-approved credit, financial or payment institution; trusts, guarantees, reserve accounts may be imposed (Art 31). Balance with funds in transit covers player balances, 90% or more in the account, shortfall made good forthwith (Art 38). Changes need prior approval (Directive 3, Art 38).	Monthly player funds report within 20 days of month end with back-end screenshots, bank/PSP statements, merchant screenshots (Directive 3, Art 39; MGA), plus failed VFA deposits/withdrawals (DLT Policy 2.8). Live or real-time mirror server of essential regulatory data (Art 17(4)). Annual auditor AUP on player funds (Art 41). AML records 5 years (PMLFTR reg 13); audit logs 2 years (Art 16(6)).
Italy — Agenzia delle Dogane e dei Monopoli	Only traceable instruments in the account holder's name; cash only at retail points, up to €100 per week per account. Virtual assets not permitted in practice.	One account per player per concessionaire; withdrawals to a traceable instrument in the holder's name.	Suspicious transaction reports to UIF through Infostat-UIF.	Account balances usable only for gaming transactions; guarantee lodged in ADM's favour.	Real-time exchange with the central system; each transaction receives a unique code before the account moves; infrastructure in the EEA. AML records 10 years.
Greece — Hellenic Gaming Commission	Bank and credit transfers, debit, credit and prepaid cards, and e-wallets, all through payment service providers. Virtual assets not permitted.	Instruments owned by the player; ownership confirmed for deposits from €5,000 and withdrawals from €800; winnings to the player's own EU/EEA account.	Due diligence at €2,000; deposits capped at €800 until verification. Suspicious transaction reports to the Anti-Money Laundering Authority.	Separate player account; any shortfall cured within 3 business days.	Real-time link through an intermediate control system; certified data "Safe" every 6 months. Gaming data 10 years; AML 5 years.
Cyprus — National Betting Authority	Online betting only; online casino prohibited. Funding by card, electronic transfer or e-money; no cash, no credit. Virtual assets only with the Authority's approval.	Winnings within 5 working days, only to the account the stakes came from; instruments in another person's name treated as high risk.	Due diligence at €2,000 of deposits. Suspicious reports to MOKAS through goAML; quarterly AML report to the Authority.	Client account at a credit institution; shortfall fixed within 3 days of month-end.	Backup server in Cyprus with real-time access for the Authority; national self-exclusion platform. Retention 5 years.

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Portugal — SRIJ	Only electronic payment instruments in legal tender, via authorised payment service providers (Regulamento 903-B/2015), which excludes virtual assets; instruments disclosed to the regulator; flows through an EU credit-institution account.	Balances paid only to a payment account the player named and holds, or to a bank account if the instrument cannot take refunds; identity verified before withdrawal.	Due diligence at registration and from €2,000. Suspicious reports to the UIF of the Polícia Judiciária.	€500,000 guarantee per licence (bank guarantee, insurance or deposit) securing legal obligations, including to players, reviewable against balances; separate €100,000 tax guarantee. Segregation to be confirmed.	Certified system linked in real time; XML financial reports with hourly summaries; central self-exclusion register. Retention at least 7 years.
Spain — Dirección General de Ordenación del Juego	Regulator-coded list of payment types; no credit, and no payment forms concealing loans (RD 1614/2011 art. 37); no negative balances. Virtual assets reported as not permitted (to be confirmed).	Withdrawal ordered within 24 hours (RD 1614/2011 art. 35). Each deposit and withdrawal reported with method, provider, last four digits and a holder-verified flag; identity verified within one month before prizes are paid.	Due diligence at €2,000, single or linked. Suspicious reports to SEPBLAC without delay on form F19-1; the electronic channel is reserved for credit institutions.	Player deposits in exclusive, separate current accounts in Spain notified to the regulator, used only for gaming, with limited signing powers (RD 1614/2011 art. 39). Licence guarantees (€2 million initially).	Internal control system: XML to the regulator's schema in an EU data warehouse, real-time, daily and monthly; central self-exclusion register (RGIAJ). AML 10 years.
France — Autorité nationale des jeux	Online betting, horse racing and poker only; no online casino. Payments through EU/EEA payment service providers (Law 2010-476 arts. 17–18). Virtual assets not addressed.	Holder of the payment account verified; balances repaid only to a single payment account the player holds with an EU/EEA provider (art. 17), immediately — delay allowed only to file a suspicious report.	Every online player identified at account opening. Suspicious reports to Tracfin through ERMES, in principle before execution.	Surety, trust, insurance, escrow account or similar mechanism guaranteeing repayment of all player balances in all circumstances (Law 2010-476 art. 15).	Real-time archiving of all data on a frontal in metropolitan France with a certified data safe (art. 31); national gambling ban register. Data retained 5 years after account closure.
Netherlands — Kansspelautoriteit	Instruments from EU-licensed banks, payment or e-money institutions, traceable to the player; anonymous instruments prohibited. Credit-card and virtual-asset rules not found.	Deposits only from the player's own account; payout without undue delay, no minimum withdrawal and no wagering requirement on deposited funds.	Full due diligence before play. Reports to FIU-Nederland through goAML (objective indicator €15,000). Affordability checks from €700 monthly net deposits (€300 for ages 18–23).	Third-party funds foundation or approved equivalent.	Operator-hosted Controle Databank in the Netherlands, fed near real time as XML to the regulator's schema; CRUKS check. AML 5 years.
Belgium — Gaming Commission	Credit cards prohibited online. No virtual-asset framework.	Account in the player's name and non-transferable; separate account per licence and no transfers between player accounts (law of 18 February 2024).	€200 weekly deposit cap per operator; an increase needs approval after a National Bank credit-register check. Identification for stakes or winnings of €2,000; suspicious reports to CTIF-CFI through goAML (sole channel since October 2024).	Not found.	Permanent data link to the Commission; EPIS exclusion check before play. AML records 10 years.
Germany — Gemeinsame Glücksspielbehörde der Länder (GGL), public-law body in Halle (Saale), set up 1 July 2021 under the GlüStV 2021; licenses and supervises online sports betting, virtual slots and poker, runs LUGAS since 1 Jan 2023 and is their GwG supervisor (§ 50 Nr. 8 GwG). OASIS exclusion file run by Regierungspräsidium Darmstadt (§ 8). FIU at the Generalzolldirektion receives STRs (§ 43 GwG).	Deposits and payouts only via a payment account in the player's name at a bank, payment or e-money institution; anonymous instruments banned (§ 6b(4)); GwG § 16(4): direct debit, transfer or card in the player's name; exception EUR 25 single / EUR 100 a month; no interest (§ 16(3)). No loans (§ 4(5)). Virtual assets: not found. GGL can bar banks and PSPs from illegal-gambling payments (§ 9(1)).	Payment account in the player's name (§ 6b(4)); no play or payout before identity verified (§ 6a(4)); transfers between player accounts banned (§ 6b(5)). Payouts only to the player's own account, via the § 16(4) methods, with a purpose text (GwG § 16(7)); no same-method rule in the GlüStV. Closing balance paid within 5 working days, no fees (§ 6b(7)); player-set automatic payout offered (§ 6b(3)).	No EUR 2,000 threshold online (GwG § 10(5) disapplied by § 16(1)); full CDD before play (§ 6a(4)). STRs to the FIU without delay (§ 43 GwG) via goAML; registration mandatory since 1 Jan 2024 (§ 45(1)). Deposit limit max EUR 1,000 a month cross-operator, checked in the Limitdatei; by permit to EUR 10,000 with proof of means, EUR 30,000 for max 1% of players (GGL rule); increase after 7 days (§ 6c).	Entrusted funds on a non-offsetting account at a credit institution, separate from own funds, protected against insolvency of operator and bank, always equal to the sum of player balances, not usable for third-party claims; confirmed to the authority by a lawyer or tax adviser (§ 6b(6)). Permit security: EUR 5m bank guarantee, up to EUR 50m (§ 4c(3)). Game payments via a German or EU bank (§ 4a).	LUGAS (GGL, run by Dataport): Limitdatei (§ 6c) and Aktivitätsdatei against parallel play (§ 6h), checked before deposit and play; OASIS at registration and login (§ 8). Safe-Server: operator-run store of all supervision data, immutable, pseudonymised, direct GGL access (§ 6i(2)); format in unpublished guideline; retention not found. Player data 5 years after closure (§ 6g); AML 5 years (GwG § 8).

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Austria — Finanzamt Österreich (Dienststelle für Sonderzuständigkeiten) : concessions and supervision since 1 Jan 2021 (GSpG § 14, § 19); BMF: legislation, strategy. Geldwäschemeldestelle (A-FIU) at the Bundeskriminalamt (§ 4 Abs 2 BKA-G). Sports betting: Länder Wettengesetze (W, NÖ, OÖ, Sbg, Stmk, Ktn, T, Vbg; Burgenland not located). Bill 594 d.B.: Finanzamt = Glücksspielaufsichtsbehörde (§ 60 Abs 56).	Federal monopoly (§ 3); one concession covers Elektronische Lotterien (§ 12a, § 14 Abs 6): Österreichische Lotterien / win2day to 30 Sep 2027. No payment-method or virtual-asset rule found. Bill 594 d.B. (5 Aug 2026, in committee; EU standstill): unlimited online concessions, cooling-off 1 Jan 2027, start Oct 2027; PSPs stop payments for banned games in 3 banking days (§ 56e, from 1 Jan 2027).	No name-match, closed-loop or payout-deadline rule found (GSpG §§ 12a, 14, 16, 31c; bill §§ 13, 14). Payout terms sit in the Spielbedingungen for Elektronische Lotterien, which must regulate 'die Geltendmachung und die Auszahlung der Gewinne' and need prior approval of the Finanzamt Österreich (§ 16 Abs 1, Abs 7 Z 3); not opened.	FM-GwG applies via GSpG § 31c. Online (§ 12a Abs 1): identification (FM-GwG § 6) only where the risk analysis shows no low risk (§ 31c Abs 3 Z 2); EUR 2,000 per visitor and day is a casino and VLT trigger (Abs 2 Z 4). STRs 'unverzüglich' to the Geldwäschemeldestelle (FM-GwG § 16) via goAML; 5-year look-back on FIU enquiries. Bill: deposit cap EUR 250 a week under 26, EUR 1,680 a month from 26.	No segregation or trust rule found (GSpG §§ 12a, 14, 16, 19, 31c; bill §§ 13, 31g-31i). Concession security: Sicherstellung of at least 10 pc of the share capital, mainly for concession and gambling levies (§ 14 Abs 4 Z 2); paid-in capital at least EUR 109m (§ 14 Abs 2 Z 3); Staatskommissär at the concessionaire (§ 19 Abs 2).	Today: VLTs linked to the Bundesrechenzentrum (§ 12a Abs 4); audited accounts to the Finanzamt Österreich within 6 months (§ 19 Abs 4); AML records 10 years after the relationship ends (FM-GwG § 21 via § 31c Abs 3 Z 1). Bill 594 d.B.: Sperrregister (§ 31g), Limitregister (§ 31h), Safe-Server at operator cost (§ 31i); in force 1 Jan 2027 (§ 60 Abs 54); participation start by BMF ordinance.
Switzerland — ESBK and Gespa	Online casino only as an extension of a land-based concession; lotteries and betting a monopoly. Virtual assets not accepted; ESBK found in September 2023 that the framework lacks safeguards for crypto.	Swiss-resident players only; winnings only to accounts in the player's name; online lottery and betting winnings over CHF 1,000 paid directly to that account (GwV-EJPD art. 21).	Identity checked at account opening; AML identification at CHF 4,000 within 24 hours (casinos) or CHF 15,000 deposits / CHF 10,000–25,000 winnings within 30 days (lotteries, betting). Reports to MROS through goAML.	Not found.	Shared exclusion register, also valid in Liechtenstein since January 2025; DNS blocking. Retention 10 years.
Denmark — Spillemyndigheden	Deposits only through regulated payment providers; no cash; no credit. Unregulated virtual assets not accepted.	Identification by national ID and eID; no transfers between accounts; balance paid within 5 working days of closure.	Full identification at registration; suspicious reports through goAML.	Entrusted funds in a separate, insolvency-protected bank account.	Operator-hosted SAFE data vault (XML), sealed daily with a regulator-issued tamper token; ROFUS checks. SAFE 12 months online plus 48 archived; KYC 5 years.
Sweden — Spelinspektionen: gambling authority under Spellagen (2018:1138) and Spelförordningen (2018:1475), licenses and supervises, keeps the Spelpaus register, supervises licensees' AML compliance and issues SIFS rules. Finanspolisen (Polismyndigheten) is the FIU: STRs under 4 kap. 3 § Lag (2017:630) go to it via goAML.	Deposits only from a payment service provider under the Payment Services Act (13 kap. 5 §); no cash; stakes in SEK (LIFS 2018:2). From 1 May 2026 (SFS 2026:90, 14 kap. 8 §) no credit-financed play: credit cards, invoice or other third-party credit (prop. 2025/26:11). Virtual assets: no rule found; excluded in effect. PSPs must reject MCC 7995 card payments to unlicensed operators (SF 13 kap. 1 §).	Deposit card, account or other payment service must belong to the account holder, also after a change (SIFS 2022:3 9 kap. 8 §); one account per licensee; no transfers between accounts (13 kap. 6 §). Temporary account until ID verified: max 1/4 price base amount (SEK 14,800 in 2026), 30 days, no payouts. Closing balance within 5 business days, no fee (SF 10 kap. 2 §). Same-method rule not found.	Deposit limits per day, week and month set before online play; cut immediate, rise after 72 h; contact above SEK 10,000 a month (14 kap. 7 §; SF 11 kap. 3, 5 §§). CDD at registration and for single or linked stakes or winnings of EUR 2,000 or more (AML Act 3 kap. 5 §). STRs to Finanspolisen without delay (4 kap. 3 §) via goAML. SIFS 2019:2 AML rules; guidance: under SEK 20,000 a year low risk.	Player balances kept separate from the licensee's own funds (13 kap. 7 §); player told at account opening how funds are protected in insolvency and must specifically accept those terms (LIFS 2018:2 § 7). Prize-pool funds separated (SF 5 kap. 4 §). No guarantee, trust or insurance requirement found (Spellagen, Spelförordningen, LIFS 2018:2 and 2018:5 searched).	Spelpaus (14 kap. 12 §) checked before play (12 kap. 4 §), at registration and each login (SF 11 kap. 9 §) and before direct marketing, via API (SIFS 2026:3, 1 Aug 2026). Gaming system in Sweden unless allowed abroad with remote access (16 kap. 2 §); no data vault; half-yearly RG statistics. Retention: system data 5 years (16 kap. 5 §); AML 5 years, up to 10. B2B software permit since 1 July 2023.
Norway — Lotteri- og stiftelsestilsynet	State monopoly (Norsk Tipping, Norsk Rikstoto) plus a private market: online and internet-based bingo are licensed; no gambling on credit.	One account per operator. eID is not a legal requirement but the operators' own choice (most use it). Full identification at registration. Mandatory bet limits (daily and monthly).	Suspicious reports to the FIU.	Gambling operators keep a separate gambling account for each gambler; gamblers have an overview of their transactions and gambling activity.	Banks block payments to unlicensed operators by merchant category and named payment facilitators; DNS blocking. Retention 5 years. [Reviewed with Lotteritilsynet, October 2026.]

CTRES v1.0 — open draft — ctres.org

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Finland — Poliisihallitus (National Police Board) supervises and licenses until 30 June 2027 [Arpajaislaki 1047/2001; Rahapelilaki 10/2026 s. 106]; Lupa- ja valvontavirasto from 1 July 2027 [s. 57]; Ministry of the Interior (game rules and decrees); AML supervisor of gambling: Poliisihallitus [Rahanpesulaki 444/2017 ch. 7 s. 1]; FIU: Rahanpesun selvittelykeskus (NBI).	Veikkaus monopoly to 30 June 2027; licensed online betting and casino from 1 July 2027 [Rahapelilaki 10/2026]; applications to Poliisihallitus from 1 March 2026. From 1 July 2027: no play on credit or pledge, no loan money passed on (s. 25); player-set daily and monthly bank-to-game-account limits (s. 30). Virtual assets: no acceptance rule found; blocking covers crypto providers (2024).	Identity verified at registration; play only logged in; personal game account (Rahapelilaki ss. 20, 22, 28, from 1 July 2027; Veikkaus now: one personal account, Arpajaislaki s. 14). Transfers from the player's own bank account (s. 30); no rule that the bank-account holder must match - Parliament asked for one to be assessed (HaVM 28/2025). Balance paid without delay on closure, no fee (s. 23).	Rahanpesulaki 444/2017: gambling operators are obliged entities (ch. 1 s. 2); customer identified and verified when stakes or winnings reach EUR 2,000, single or linked (ch. 3 s. 2); suspicious transactions reported without delay to the Rahanpesun selvittelykeskus (FIU, NBI) (ch. 4 s. 1); channel (goAML) not verified. No threshold-based routine report found.	Funds on the game account kept separate from the licence holder's own funds; how they are protected in insolvency told to the player at the latest when the account is opened (Rahapelilaki s. 22(4), from 1 July 2027; Ministry of the Interior may issue a decree on the game account, none found). Guarantee or bond: not found.	Game and account data to the authority, kept 5 years (Rahapelilaki s. 45, from 1 Jul 2027); personal data 5 years (s. 36); CDD records 5 years (AML Act ch. 3 s. 3). Self-exclusion by notice to the authority, indefinite bar min 1 year (s. 29). Payment blocking of listed operators from 2023 (Arpajaislaki s. 62 l). Veikkaus: fast-game loss limits EUR 500/day, EUR 2,000/month (SM decree 16.9.2026).
Estonia — Tax and Customs Board (Maksu- ja Tolliamet, EMTA): activity licences, operating permits, supervision, blocking. FIU is the Rahapesu Andmebüroo (fiu.ee); from 1 Jan 2026 EMTA needs FIU approval before licensing and the FIU may draw operators' reporting data from EMTA (Gambling Act § 57(4)). Minister of Finance issues the data regulation (määrus nr 26).	From 1 Jan 2026 a stake may be money, a monetary obligation or a crypto-asset (Gambling Act § 2(2)); remote stakes must arrive through a credit institution, payment institution, e-money institution or crypto-asset service provider licensed in the EEA (§ 5(3)). Permit application must describe how a crypto or intermediary payment is proved to come from the player's account (EMTA form, Annex 8).	Stakes accepted only from the same player's account; payouts only to the account paid from (§ 53(1)(5)-(6); EMTA form, Annex 8). From 1 Jan 2026 the account is one at a credit institution, payment institution or e-money institution, or cash at the operator's gaming location (§ 53(1)(5)). Operator credit agreements banned (§ 34(1)). One-account rule, payout deadline: not found (full Act searched).	AML Act (RahaPTS) § 19(3): due diligence when a payout, a stake or both reach EUR 2,000, in one or linked payments within a month. STR, UTR, cash transaction (CTR: cash over EUR 32,000 in one or related transactions) and TFR reports to the FIU, immediately and no later than 2 working days, through the FIU web form into RABIS (rabis-web.fiu.ee) or XML over X-tee.	No segregation, trust or player-balance guarantee rule found (Gambling Act §§ 1-33[1], EMTA permit pages and forms). Share capital at least EUR 1,000,000 for games of chance incl. remote, EUR 130,000 toto, EUR 25,000 skill games (§ 9); additional reserve of at least one-third of share capital built from at least one-seventh of annual net profit (§ 10). Security deposit (tagatis): not found.	Electronic recording and control system (EAKS) connected to EMTA's system; EMTA requests data over X-tee (EHMA); data list in Minister of Finance Regulation 26. HAMPI restrictions list (§ 39) checked before play; term 6-36 months set by the player. Gambling records kept at least 5 years (§§ 53(3), 54(3)); AML records 5 years (RahaPTS § 47; FIU guidelines 5.2, 5.4). Unlicensed sites blocked.
Latvia — State Revenue Service	Settlement through a credit-institution account; credit cards permitted when the card belongs to the player; payment service providers allowed; every transaction identified to the individual making it. Supervision transferred to the State Revenue Service (VID) in 2026.	Winnings may not be transferred to an account from which no deposit into the gaming account was made. Land-based: winnings may be paid in cash, identified and reported to the FIU at the reporting thresholds.	AML standards as across the EU. Suspicious reports and threshold declarations to the Financial Intelligence Service through goAML.	Held exclusively in a Latvian credit institution or bank account; no requirement to hold them separately.	Self-exclusion register; quarterly statements, and quarterly turnover reports on the VID's demand; operators must give the VID unimpeded remote access to their gaming platforms and the information in them; domain blocking within 5 working days. Retention 5 years. [Reviewed with the State Revenue Service, October 2026.]

CTRES v1.0 — open draft — consultation

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Lithuania — Gaming Control Authority	Stakes only from the player's payment account to the operator's.	Winnings to the gaming account or a payment account the player names; cash payout at a land-based venue on request.	Identify (unless already established) and verify the client and register the client at a deposit, payout or exchange of cash for chips or chips for cash above EUR 1,000 or the equivalent, in a single or several linked operations. Suspicious reports to the FNTT.	Winnings reserve of at least €72,400 in securities, bank funds or cash, restored within 2 calendar days.	The operator platform must be connected to LAKIS (Slot Machine Control Information System) and must record and transmit to LAKIS, at least every 30 days, the data specified in the Law on Gaming. Remote access to operator systems; self-exclusion register; illegal-operator list binding payment providers. Platform data 8 years from the end of the remote gaming contract (Art. 16(8), from 1 Nov 2025; confirmation asked of the LPT). [Reviewed with the Gaming Control Authority, October 2026.]
Romania — ONJN	Banking-system instruments; payment processors licensed as gambling suppliers and bound by the operator blacklist.	Deposits capped at €200 until verification within 30 days; winnings paid within 3 business days.	Suspicious reports to ONPCSB before execution; cash from €10,000 within 3 working days.	Separate account at a Romanian bank; guarantee of €2 million (€5 million for casino).	Safe server and mirror server in Romania; real-time self-exclusion register. Retention 5 years.
Bulgaria — National Revenue Agency	Stakes and payouts through a bank account licensed in Bulgaria or the EU; winnings above BGN 5,000 (about €2,500) only by bank transfer.	Not found.	Due diligence at €2,000; suspicious reports to FID-SANS, before the operation where possible.	Collateral in cash or a bank guarantee.	Every wager and payout to an Agency server in real time; gambling data stored in Bulgaria; exclusion register; payment institutions barred from serving unlicensed operators. Retention: AML 5 years, otherwise the tax limitation period.
Hungary — SZTFH	Transfer, linked card, e-money and carrier billing; online casino reserved to land-based concessionaires.	Payment-account name must match the player's; winnings to the player's own account within 30 days of the claim.	Due diligence at winnings of HUF 600,000; suspicious reports to NAV PEI through its online form.	Not found.	Remote back-office access; player-protection register including court-ordered restrictions; card payments to unlicensed operators blocked. Gambling data 6 years.
Poland — Minister of Finance (minister właściwy do spraw finansów publicznych): betting permits and casino concessions, approval of responsible-gaming rules, Register of domains. National Revenue Administration (KAS): supervision and access to archived data (art. 15d). FIU: Generalny Inspektor Informacji Finansowej (GIIF); gambling operators are obliged institutions (AML Act art. 2(1)(20)).	All online gambling except betting and promotional lotteries is a state monopoly, run by Totalizator Sportowy (art. 5(1b)); online betting under a Ministry permit (art. 6(3)); .pl domain only (art. 15d(2)). Payment transactions of online games only via payment service providers listed in art. 4(2)(1)-(4), (6), (9) of the Payment Services Act (art. 15e). Credit cards and virtual assets: not found.	Registration on a player account or temporary player account is a condition of starting and continuing play; play must stop when the account balance is exhausted; 18+ verification (responsible-gaming rules approved by the Minister, art. 15i). Own-account, third-party payment and payout-deadline rules: not found.	Due diligence when stakes placed or winnings collected reach EUR 2,000 (AML Act art. 35(1)(4)). Suspicious-circumstance notifications to GIIF without delay, at latest 2 business days after confirming suspicion (art. 74); above-threshold reports - cash and transfers over EUR 15,000 - within 7 days (art. 72); via SI GIIF (regulation of 4 October 2018). Art. 72 exclusions do not cover gambling.	Financial security of PLN 480,000 for online betting (PLN 40,000 per land-based betting point), protecting players' financial interest and the gaming tax, as a bank or insurance guarantee or a cash deposit on the account named by the authority (art. 63(1), (2a), (3)-(4); Reg. of 23 June 2010). Segregation of player balances: not found.	Domain register (hazard.mf.gov.pl) feeds ISP and payment-provider systems; ISPs block in 48 h (art. 15f); payment providers stop in 30 days, fine to PLN 250,000 (arts 15g, 89). Game data archived in real time in PL/EU/EEA, KAS remote access, 5 years (art. 15d). Winnings register at PLN 2,280+, certificates kept 5 years (art. 20); quarterly data by the 21st (art. 79). AML records 5 years (art. 49).

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Czech Republic — Ministry of Finance (basic licences, kauce, RVO register, blocklist; gambling department odbor 73). FIU is the Financial Analytical Office (FAÚ).	Deposits to the online user account only from the registered payment account or instrument held in the player's own name at a provider authorised in the EU or EEA (§ 17e); cash deposits and cash withdrawals capped at CZK 10,000 per 24 hours (§ 17e(6)). Virtual assets may not be prizes (§ 10(6)); no other crypto rule found.	No deposits from, or transfers to, any account or instrument other than the registered one (§ 17e(4)-(5)). Winnings paid without undue delay, within 30 days of evaluation (§ 10a). Withdrawals from the user account on request, without delay and free of charge (§ 17i). Ban on operator credit to players not found.	AML Act identification when a transaction exceeds EUR 1,000 (§ 7(1)); suspicious transaction reports to the FAÚ without undue delay, immediately in urgent cases (§ 18), through its e-form (data box required).	Kauce (security deposit) per game type: CZK 30 million for online betting, totalizator and bingo, CZK 50 million for online lottery, technical and live games (§ 89(5)); held on the Ministry's account at the CNB or as a bank guarantee; covers unpaid state debts and unpaid winnings (§ 89(4)). Segregation of player balances not found.	Daily automated reporting under vyhláška 10/2019 Sb. (MF pokyn: denní herní výkaznictví); RVO register (§§ 16-16b: benefit recipients, criminal bans, insolvency, maintenance defaulters, execution debtors, self-exclusion) via AISG; blocklist (§§ 84a-84d): ISPs block listed sites, PSPs block payment accounts, apps barred. Verification data 3 years (§ 17c); AML records 10 years (AML Act § 16).
Slovakia — Úrad pre reguláciu hazardných hier (ÚRHH), regulator under Act 30/2019 (§ 1(1)(e), § 77); Ministry of Finance issues the implementing decrees (Decrees 134/2019 and 142/2019). FIU: Finančná spravodajská jednotka (FSJ), an organisational unit of the Police Presidium (Prezídium Policajného zboru), not of the National Crime Agency.	Stakes in cash or cashless (§ 14(8)). Server records each account's payment account or card number, deposits, withdrawals (Decree 142/2019 § 2(2)(b)). ISPs and payment providers block listed sites and accounts on the URHH weekly blacklist, no court order (§ 85, from 1 January 2026). Bank card fees on player-account deposits taxed separately from 2026 (261/2025). Virtual assets: not found.	Online play requires registration and a player account; one account per operator; balance refunded on closure (§ 31). Funds deposited above the stake withdrawable after any game (§ 14(8)). Winnings paid within 5 working days of the claim, AML Act aside (§ 14(18)); claim period at least 30 days (§ 14(17)). No loans or credit to players (§ 33(5)); no own-account or third-party payment rule found.	Gambling operators are obliged entities (AML Act 297/2008 § 5(1)(d)). Basic due diligence for a gambling transaction of EUR 2,000 or more, single or linked (§ 10(2)(e)); identification and verification for other transactions of EUR 1,000 or more (§ 10(3)). Unusual transactions, incl. attempts, reported to the FSJ without undue delay (§ 17), only via the goAML web application since 1 January 2025.	Financial guarantee (finančná zábezpeka) on the URHH account, used only for levies, default interest, URHH funding, fines and payment of winnings (§ 2(t), § 67); EUR 750,000 for online betting or internet-casino games, EUR 1,250,000 for both, EUR 1,500,000 combined with land-based (§ 69). Player-account balance refunded on closure (§ 31(3)). Segregation of player funds: not found.	Server in Slovakia, free URHH online access (§ 14(21)-(22); Decree 142/2019 § 2). Daily notices of stakes and winnings for internet games, monthly for some lotteries (§ 74; Decree 134/2019). Register of excluded persons (§§ 33-38). Game data on server to end of the next year, backups two prior years (142/2019 § 2(11)); player interface 60 days (§ 12(3)); AML records 5 years (297/2008 § 19(2)).
Serbia — Games of Chance Administration	Cashless, plus cash at approved desks; cash pay-ins and cash payouts each capped at RSD 1,175,000 per player in 30 days.	Deposits only from, and withdrawals only to, the player's own current account; no transfers between players' accounts.	Due diligence at €2,000; identity checked before any deposit. Reports to the APML.	Guarantee (amount to be confirmed).	Every transaction by API in real time; database or mirror in Serbia; monthly payment-channel reports by the 5th through the Administration's web service. Retention 10 years.
Croatia — Ministry of Finance	Cards, transfers, e-payments, cash at betting shops; activation vouchers for online casino.	One registered account for withdrawals, checked against the tax-number register; online casino accounts withdraw winnings only; dormant balances returned after 12 months.	Reports to the Anti-Money Laundering Office.	Bank guarantees (from about €398,000 for online casino).	Real-time link to the Ministry; central exclusion register (2026). Retention 5–10 years.

CTRES v1.0 · Data standard · hello@

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Bosnia and Herzegovina — Federation: Federal Ministry of Finance approves, Tax Administration FBiH supervises and runs the on-line monitoring (Zakon o igrama na sreću, Sl. novine FBiH 48/15, 60/15). Republika Srpska: Ministry of Finance licenses, Republička uprava za igre na sreću within it (Zakon o igrama na sreću, Sl. glasnik RS 22/19). AML is state-level: FOO within SIPA (Sl. glasnik BiH 13/24).	Federation online betting: winnings paid at betting shops, to the player's virtual account or to the registered transaction account (Pravilnik, Sl. novine FBiH 59/16, 23/24, Art. 32); deposit methods not listed. RS: players pay electronically, non-cash, through bank accounts at a bank seated in RS (Arts. 89, 92). Crypto: not found in either entity.	Federation: payout on written request to the player's transaction account at once, at latest within 3 days (Art. 33); funds returned there after 12 months without a deposit; own-name rule and third-party payments not found; identity verified before registration, no ID photo upload. RS: one account per player; deposits and payouts only for registered players with a virtual account (Arts. 91, 92).	State AML law (Sl. glasnik BiH 13/24): gambling operators obliged entities (Art. 5); CDD at registration on a betting platform regardless of stake (Art. 19(2)); identification at KM 2,000 or more (Art. 19(4)); KM 30,000 CDD trigger (Art. 12). FIU: FOO within SIPA. STR before execution, immediately (Art. 42); cash transactions of KM 30,000 or more at once, at latest 3 days (Art. 43).	Federation: licence guarantee or dedicated deposit KM 1,000,000 casino, KM 600,000 betting (Arts. 71, 93; not online-specific); online player funds at a bank on segregated accounts, shortfall covered within 5 days, shielded from the operator's creditors (Pravilnik Art. 31). RS: bank balance must always cover player funds (Art. 89); fee KM 300,000, guarantee 25% of annual fee costs (Arts. 17, 85).	Federation: direct on-line link to the Tax Administration server (Art. 82); internet system linked to its central office as one separate payment point (Pravilnik Art. 6); payouts of KM 10,000 or more logged (Art. 8); paid tickets kept 1 year (Art. 87). RS: real-time access, data kept in RS, fee return by the 15th monthly, receipts records 5 years (Arts. 14, 87, 94). AML records 10 years (Art. 92).
Montenegro — Games of Chance Administration	Euro only; online limited to land-based licensees; banks can be asked to block payments to unlicensed sites.	No third-party payment at the cash desk; separate record and promotional accounts.	Identification at €20 stakes or winnings and at €2,000 transactions.	Bank guarantees covering winnings.	Real-time online supervision of all payments in and out. Retention 5 years.
Kosovo — Tax Administration	Gambling prohibited since 2019; no licensed flows.	Not applicable.	FIU-K.	Not applicable.	A profile would cover payment-side blocking only.
Eurasia, Middle East and Asia					
Ukraine — PlayCity	Non-cash only, through current accounts at Ukrainian banks, with a fiscal receipt per transaction; gambling with credit funds banned; no route for virtual assets.	One player, one gaming account, one personal bank account; no third-party bets or account use. Spending and time limits set before play; self-restricted players paid out within 5 days.	Threshold transactions from UAH 55,000 for gambling (UAH 400,000 generally), reported within 5 business days or monthly, by type; suspicious reports immediately; to the State Financial Monitoring Service.	Bank guarantee or deposit of 7,200 minimum monthly wages securing payment of winnings.	State Online Monitoring System in pilot (12 operators connected by April 2026; second phase due end 2026): each bet, payout and refund in near real time with a unique identifier. AML records 5 years.
Georgia — Ministry of Finance; Revenue Service	GEL only (foreign payments converted to GEL on receipt), by card, licensed payment providers and bank transfer; virtual assets not a lawful means of payment.	Biometric and age checks against state databases; players aged 25 and over; 5% income tax withheld on withdrawals.	Due diligence when accepting funds or paying winnings above GEL 5,000; threshold and suspicious reports to the Financial Monitoring Service.	Security required for totalisators.	Connection to the national control system. Player data 5 years; AML records 5 years.
Armenia — Ministry of Finance; State Revenue Committee	Cash, e-money and terminal top-ups banned; Armenian bank cards only; banks decline gambling-category payments to unlicensed operators (May 2026).	Dedicated gaming account funded only from a bank account or card verified as the player's own; winnings only to a card. Gambling capped at 20% of declared annual income from January 2027.	Bets, winnings and lottery purchases from AMD 1 million reportable, with suspicious transactions, to the Financial Monitoring Center of the Central Bank.	Not found.	Central real-time platform for wagers, deposits and losses (rollout January 2027); five-year self-exclusion across all sites and blocking of unlicensed sites from January 2027.
Azerbaijan — state operator (Azerlotereya)	State monopoly: one lottery and one licensed sports-betting operator; casinos allowed only on artificial islands (July 2025), none operating. Payment rules not found; no virtual-asset providers registered.	Not found.	Cash transaction reports from AZN 15,000 for lottery and betting organisers; suspicious reports to the Financial Monitoring Service.	Not found.	Central system not found. AML records at least 5 years.
Kazakhstan — Ministry of Tourism and Sports	Online limited to bookmakers and totalisators; bets and winnings only by electronic payment through the Unified Accounting System (NomadPay); banks reject payments to blacklisted operators. Virtual assets not accepted (to be confirmed).	Two-step biometric identification; debtors, specified public officials and self-excluded players blocked automatically at the central hub.	Reports to the Agency for Financial Monitoring; gambling-specific thresholds not found.	Not found.	Unified Accounting System (live 5 March 2026) records every bet, payment and winning, stores player data and enforces per-player monthly limits.

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Uzbekistan — National Agency for Prospective Projects	Payments only through the state register, using cards issued or processed in Uzbekistan; crypto-assets barred as a means of payment (to be confirmed). First two licences issued July 2026.	Remote biometric identification before play; monthly spending cap reported at 10% of verified income (to be confirmed); self-exclusion through the register.	Reports to the FIU (Department for Combating Economic Crimes).	Reserve in a separate bank account (75,000 base units for betting and online games).	Unified State Register of Bets and Players: registrations, bets, deposits and winnings in real time; monthly limits.
United Arab Emirates — GCGRA	No published list of methods; a new method needs a risk assessment; credit cards only in the player's own name. Virtual assets not addressed.	Withdrawals by the deposit method; third-party payments limited or prohibited; national ID at sign-up.	Due diligence at AED 11,000, single or linked (Cabinet Resolution 134/2025, art. 3); such amounts must pass through a player account. Suspicious reports immediately to the UAE FIU through goAML.	Not found.	Unified Player Database across licensees (in development). Retention 5 years from the transaction or end of the relationship (art. 25).
India — MeitY; Online Gaming Authority of India	Online money games prohibited (2025 Act, in force May 2026); banks and payment firms barred from processing them, including virtual tokens.	Not applicable online.	Land casinos report to FIU-IND: cash over ₹10 lakh a month; suspicious reports within 7 days.	Not applicable.	Payment-blocking orders to banks; registration check before processing permitted games. Retention 5 years.
Philippines — PAGCOR (Electronic Gaming Licensing Dept) licenses e-games, e-bingo, sports betting and their online platforms; its PASED supervises AML compliance. AMLC is the FIU; casinos incl. internet-based casinos are covered persons (RA 10927). BSP licenses and supervises payment providers (BSFIs: banks, digital banks, NBFIs, EMIs) and is consulted on accredited payment SSPs (Annex E, 4 Jun 2026).	Payment gateway and channel providers are PAGCOR-accredited SSPs; BSP-supervised ones file BSP licences and NRPS/DPS proof and follow AMLC rules (Annex E, 4 Jun 2026). All BSIs must remove in-app gambling access links in 48 hours (M-2025-029, 14 Aug 2025); gambling barred from BSFI digital marketplaces (Circular 1237, 16 Jun 2026). BSP 2025-26 drafts not opened. Virtual assets: no rule found.	One valid government-issued photo ID with full name and date of birth, age 21+, photo stored; first deposit min. PHP 500 (Gaming Venue Operations (GVO) framework, 6 Nov 2025); selfie rule not found in readable texts. Closed-loop rule not found. Delayed payment of winnings or balances is an offence; no payout deadline. Platform losing accreditation: withdrawals only, 60 days (Annex F, Jul 2026).	Covered transaction for casinos incl. internet-based: a single casino cash transaction above PHP 5 million (RA 10927 s. 3(b)); reports within 5 working days (AMLA s. 9(c)); suspicious transactions of any amount by the next working day (AMLC GoTRACS 2024; text not opened). Operators' internal control rules must cover cash transactions reporting (GVO framework Art. III).	No segregation, trust or guarantee rule found (GVO framework, Annexes E and F, Offenses and Penalties Rev. 3 searched). Unauthorized deductions from winnings or redeemed balances are penalised; a platform provider whose accreditation is cancelled stays liable for unsettled player funds and keeps the platform open 60 days for withdrawals only (Annex F to the GSA framework, 10 Jul 2026).	Platform providers must integrate with PAGCOR's third-party audit platform (Offenses and Penalties Rev. 3, 6 Nov 2025); real-time access rule not found in readable texts. Records of gaming operations and financial records available to the PAGCOR Monitoring Team at no cost. Retention: books and records at least 6 years (GVO framework Art. XIX); AML records 5 years (AMLA s. 9(b)); CCTV 30 days.
Africa					

CTRES v1.0 · Draft for public consultation · ctres.org · hello@ctres.org

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
South Africa — National Gambling Board (National Gambling Act 7 of 2004); nine provincial licensing authorities with exclusive jurisdiction in their provinces (s. 30), including the Western Cape Gambling and Racing Board (Western Cape Gambling and Racing Act 4 of 1996) and the Eastern Cape Gambling Board (Gambling Act 5 of 1997 (Eastern Cape)); Financial Intelligence Centre (FIC Act 38 of 2001, Schedule 1 item 9).	Online limited to betting with provincially licensed bookmakers; other interactive games unlawful (National Gambling Act s. 11); the National Gambling Amendment Act 10 of 2008 was never brought into operation and the National Gambling Amendment Bill B27-2018 remains unresolved (NCOP rejection, mediation committee 2025). Supreme Court of Appeal, 21 October 2025: Gauteng-licensed bookmakers may not offer fixed-odds bets on roulette outcomes (Portapa v Casino Association of South Africa); the Western Cape Board states the judgment has no bearing in the Western Cape (statement 5 November 2025). Cash widely used; most winnings paid in cash or by EFT; bookmakers take EFT deposits (FIC sector risk assessment, January 2024); no primary source on vouchers found. Betting websites, apps and devices need the Board's prior approval (Western Cape Racing and Betting Rules rule 37; Eastern Cape Betting Rules rule 36.1); wagering systems certified to SANS 1718 Part IV (Western Cape Bookmakers Operational Rules 2017). No rule on virtual assets found in the National Gambling Act, the Western Cape and Eastern Cape instruments or the FIC gambling-sector assessment.	Western Cape: an account is one opened in the name of the customer by the bookmaker (Bookmakers Operational Rules 2017); bookmaker backups record each account player's name, a copy of the ID, driver's licence or passport, residential address and account number (Racing and Betting Rules rule 17(4)); signed copy of betting limits before telephone or electronic betting (rule 12(4)); winning bets payable immediately after the official result (rule 10); winnings to be claimed within 90 days. Eastern Cape: certified ID copy and residential address supported by documents (Betting Rules rule 19.4); winnings paid only once FIC Act requirements are met (rule 9); website terms must set out the procedure for opening deposit accounts (rule 36.1). Credit betting allowed with a signed credit instrument (Western Cape Regulations reg 45). No closed-loop or own-account payout rule found in the National Gambling Act or the Western Cape and Eastern Cape instruments.	FIC Act: cash threshold reports for cash above R49,999.99 (reg 22B, since 14 November 2022) within 3 business days; suspicious and unusual transaction reports within 15 business days (reg 24; days exclude Saturdays, Sundays and public holidays); terrorist property reports within 5 business days; all through the FIC's goAML portal (reg 22). Risk-based customer due diligence under the institution's Risk Management and Compliance Programme (s. 42). Western Cape: cash or negotiable-instrument transactions over R25,000, including deposits for gambling, recorded with the patron's identity and copies sent to the Board within 14 days after month end (Regulations regs 47-48, licensed operators). National online gambling tax proposed by National Treasury (discussion paper, 25 November 2025; comments closed 30 January 2026; reported rate 20% of gross gambling revenue in addition to provincial taxes); not enacted as at 8 October 2026.	No rule or published condition on holding or segregating bookmaker customer balances found in the Western Cape instruments opened (Act to s. 39, Regulations, General Rules 2003, Racing and Betting Rules 2014, Bookmakers Operational Rules 2017) or in the Eastern Cape Betting Rules 2017. The Western Cape minimum bankroll rule applies to casino operators only (reg 63, land-based). The Western Cape Act lets the Board attach licence conditions and require security before operations (ss. 37, 39).	Reporting to the provincial boards. Western Cape: monthly copy of computerised backups to the Board before the 15th unless the Board has remote access (Racing and Betting Rules rule 17(3)); weekly bookmaker return by Thursday (Regulations reg 70); audited annual financial statements within 120 days of year end (reg 43); other returns as the Board determines (reg 44); R25,000 transaction records within 14 days after month end (reg 48); system failures within 24 hours (rule 20). FIC risk and compliance returns (Directive 6 of 2023). Eastern Cape: monthly backups before the 10th (Betting Rules rule 19.3). The national central electronic monitoring system monitors limited pay-out machines (National Gambling Act s. 27). Retention: FIC Act records at least 5 years (s. 23); Western Cape books, accounts and records at least 5 years (reg 40) and backups, registers, ticket and field books 5 years (rules 17(3), 31(8)); Eastern Cape backups 5 years (rule 19.3).
Malawi — Malawi Gaming and Lotteries Authority; FIA	Mobile money dominant in practice; no published rules on payment methods. Virtual assets unregulated.	Not found.	Due diligence for casino and remote gaming at MK2 million within 24 hours; cash reports from MK5 million; suspicious transaction reports within 3 days. 15% withholding on winnings at payout.	Not found.	Central monitoring system contracted in 2023. Retention 7 years.
Kenya — Gambling Regulatory Authority; FRC; KRA	Mobile money pay-bills declared to the regulator; payout route by amount — registered mobile wallet up to KES 500,000, wallet or bank up to KES 5 million, bank above. Virtual assets prohibited unless approved. (2026 regulations partly suspended by the High Court pending a hearing.)	Payouts to the player's registered wallet or bank account; player-set deposit limits by period.	Suspicious transaction reports to the FRC within 2 days and to the regulator within 24 hours. Excise duty of 5% on deposits; withholding tax on winnings.	Separate from operating funds; security bonds.	Real-time API access for the regulator's central monitoring; tax-authority integration. Retention 7 years.
Nigeria (Lagos) — Lagos State Lotteries and Gaming Authority; NFIU	Banks, cards, USSD, wallets and agents; payment gateways to be certified by the regulator (2026); payment data to be held in Nigeria from 2027. Virtual assets not addressed by the gaming regulator.	No published rule found; national identity number collected.	5% withholding on net winnings. Suspicious transaction reports to the NFIU within 24 hours, through goAML; cash thresholds of N5 million (individuals) and N10 million (companies).	Bank guarantee securing winnings under the inter-state framework.	Regulation by the states since the 2024 Supreme Court ruling; certification of systems. Retention 5 years.
Ghana — Gaming Commission of Ghana	Mobile money dominant; online betting licensed by the Gaming Commission. Virtual-asset providers licensed under the 2025 VASP Act (Bank of Ghana); no gaming rule on virtual assets.	Ghana Card the only ID accepted online; biometric check against the national ID database on each bet and on each claim for winnings (since 2025).	Suspicious reports to the FIC within 24 hours, through goAML; cash-report threshold set by the FIC per sector (gaming amount not found). 10% withholding on winnings repealed April 2025; 20% tax on gaming revenue.	Not found.	Monthly gaming-revenue returns to the tax authority by the 15th; gaming administration and monitoring system in procurement since 2023 (status to be confirmed). Retention 5 years.

PREVIEW draft for comment ctres.org

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Botswana — Gambling Authority (Gambling Act 2012, Cap. 19:03; supervisory authority for casinos under the Financial Intelligence Act 2022, Sch. II); Financial Intelligence Agency (FIU, goAML); NBFIRA licenses virtual-asset service providers (Virtual Assets Act 2025).	No remote regime in the Act: a bookmaker's licence covers fixed bets on sporting events on the licensed premises (s.82(1)); six bookmaker licensees listed, online betting under them reported since 2025 (press); no blocking rule. Banking and payment arrangements approved by the Authority, changes within 30 days (Regulations 2016 reg 79); no credit (s.107). Rails not stated; no virtual-asset rule.	Minors (under 21; Bill 2026 would set 18) barred from casino gambling areas (s.108); excluded persons kept off licensed premises and machines (s.109(8); regs 89-92). No player identity verification, access-control or closed-loop rule for bookmakers found (Act, Regulations 2016, Bill 2026). Casinos only: no cheque or fund transfer for cash or chips unless the patron genuinely gambled (reg 27(2)).	Casinos are specified parties (FI Act 2022 Sch. I; bookmakers not listed); any business reports suspicions (s.40). CDD at P10,000 (FI Regulations 2022 reg 4); cash transactions of P10,000 or more reported (reg 20); suspicious and cash reports within 5 working days via goAML (regs 21-22). Casinos log transactions above P25,000 (reg 28). Gambling (Amendment) Bill 15 of 2026 (FATF) not in force.	No segregation or guarantee rule for bookmakers or online activity found (Act, Regulations 2016, Bill 2026). Casinos only: the applicant gives a guarantee or deposits security the Authority considers adequate for obligations to persons gambling in the establishment (s.37(1)(g)).	Gambling machine licensees link machines to the Authority's central monitoring system; casinos and bingo install their own (s.96; Bill 2026 cl. 26 widens this, not in force). Online data feed not found. Monthly levy within 10 days of month end (s.50; Sch. 15: casinos 10%, bingo 8%, bookmakers 6.5%). Retention: FIA records 20 years (s.32, casinos; reg 18); casino monitoring data 5 years (reg 30).
Zimbabwe — Lotteries and Gaming Board	Mobile money and cards; USD and ZiG in use. Virtual-asset providers register with the FIU (S.I. 99 of 2026); no gaming rule on virtual assets. Online betting rules await the Lotteries and Gaming Amendment Bill.	Not found.	Due diligence when a gaming customer opens an account or transacts US$3,000 or more; suspicious reports to the FIU through goAML. 25% withholding on gross winnings from January 2026, remitted to ZIMRA by the 10th.	Casino bank guarantee of US$50,000 covering prizes and jackpots.	Real-time gaming management system announced, not yet live. Monthly tax returns by the 5th. Retention 5 years (Money Laundering and Proceeds of Crime Act).
Eswatini — Gaming Board	Online sports betting under bookmaker licences; online casino games prohibited. Regulations under the Gaming Control Act 2022 still pending. Mobile money dominant.	Clients registered with national ID (2025); minors' secondary mobile-money wallets to be blocked with the telecoms operators (announced December 2025).	Purpose checked on cash transactions over E10,000 (others over E20,000); suspicious reports to the FIU within 2 working days (2011 AML Act). Cash-report threshold left to ministerial notice; amount not found.	Not found.	Monitoring system proposed, not live. Retention 5 years (2011 AML Act).
Lesotho — Lesotho Casino Board	No online licence type (Casino Order 1989; Lotteries and Betting Act 1984); offshore activity only.	Not found.	Casino due diligence at M25,000; suspicious reports to the FIU within 7 days (2017 AML Regulations under the 2008 AML Act).	Not found.	Retention 5 years (2017 AML Regulations).
Angola — Instituto de Supervisão de Jogos	Online gaming licensed under the 2024 Gaming Activity Law (Lei 17/24); payment systems in force in Angola only. Kwanza only; foreign currency and virtual assets prohibited; locally incorporated companies only.	Players identified before buying chips or being paid; prize cheques crossed, in the winner's name and non-endorsable (ISJ instruction 2/21).	Identification of online players spending US$2,500 and of winners of US$2,500 or more; suspicious reports to the UIF immediately, through its portal. Prize tax of 10–15% by game type.	Bank guarantee of US$50,000–400,000 by type of gaming reported (2026 licensing; purpose to be confirmed).	All gaming traffic and operations to be routed through a central gaming unit to the ISJ's control infrastructure (2024 law; implementation to be confirmed). Retention 10 years.
Tanzania — Gaming Board of Tanzania	Cards, transfers, mobile money and vouchers; mobile money dominant.	One account per player, linked to one nominated bank or mobile-money account; identity verified before any wager.	Cash of US$10,000 or more and transfers of US$1,000 or more reported within 5 working days; suspicious reports to the FIU (goAML) within 24 hours. Withholding on winnings: 12% sports, 13% land casino, 15% other.	Security bond available to pay prizes.	Primary server and financial control system in Tanzania; winnings tax filed and paid electronically by the 7th of the following month. Retention 10 years.
Uganda — National Lotteries and Gaming Regulatory Board	Mobile money dominant. Tax Procedures Code (Amendment) Bill 2025 would route all stakes and payouts through one gateway licensed by the Bank of Uganda and linked to the tax authority (enactment to be confirmed).	Players aged 25 and over, checked against ID.	15% withholding on net winnings (from July 2026). Cash transactions over UGX 20 million reported to the FIA; suspicious reports through goAML.	Not found.	Central electronic monitoring system live since 2024, with data shared with the tax authority.
The Americas and the Caribbean					

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Curaçao — Curacao Gaming Authority (CGA, Stichting Gaming Control Board; LOK art. 1.1, 12.1), also AML/CFT supervisor for the gaming sector since 15 Feb 2019 (LB 19/0282, 19/0283). FIU Curacao receives unusual transaction reports (LMOT art. 2, 11). Ministerial responsibility for the LOK and the CGA mandated to the Minister of Justice (P.B. 2025/167, 13 Nov 2025).	Fiat tradable internationally; virtual currencies tradable on licensed exchanges; no currency exchange; prizes paid in the currency played (licence conditions art. 9). Crypto policy guideline (June 2026): analytics screening in and out; player, operational and treasury wallets segregated; same-wallet same-asset withdrawals by default; four steps: now, Sep 2026 (portal offline), Dec 2026, Jun 2027.	Players register to play and transact on their own behalf; play for third parties to be detected (CGA AML Regulations III.2.2). All payments between licensee and player only through the player account (licence conditions art. 9.1). T&C guideline (Apr 2026, in force within 6 months): funds returned only to the account they came from. Prizes available 30 months. No own-name instrument rule found.	CDD at NAf 4,000 (XCG 4,000) of a player's transactions, calculated daily across deposits and withdrawals (CGA AML Regulations III.1, III.3; LID art. 2b(d)). Unusual transactions from XCG 5,000 (NAf 5,000 before 31 Mar 2025), single or series per gaming day, prize payouts included; to FIU Curacao via goAML, in English, without delay; objective reports within 48 h (FIU). XCG replaced NAf 1:1.	Sufficient funds at all times to pay prizes, with ring-fencing and segregation; separate account for player deposits and winnings (licence conditions art. 6.5, 9.2). LOK art. 5.7: guarantee fund for player balances (implementing decree not found); art. 5.8(g): CGA may require segregation, reservation or insurance of balances. Crypto: player funds in segregated wallets of the licensee.	Incident report within 24 h (LOK art. 5.10(6); licence condition 13.3); portal mandatory from Jan 2026, offline since Sep 2026 and not returning (7 Oct 2026), channel pending. Change report by 15 Jun and 15 Jan (art. 5.10(4)); complaints report 15 Jan and 15 Jun; player transaction report, cadence set by CGA. Critical data on a Tier-IV server in Curacao (art. 5.9(1)(j)). AML records 5 years.
Brazil — Secretaria de Prêmios e Apostas (SPA/MF); COAF (Siscoaf segment 'SPA - Apostas de quota fixa'); Banco Central do Brasil (payment rails). MP 1.394/2026 (25 Sept 2026) prohibits fixed-odds betting; authorisations extinguished 25 Oct 2026; the SPA supervises the wind-down; Comitê Interinstitucional (Casa Civil) against illegal offer.	Transfers only between the bettor's registered account and the operator's transactional account at BCB-authorised institutions; Pix, TED, debit and prepaid cards and book transfer allowed; cash, boleto, cheques, virtual assets, credit/post-paid and third-party payments prohibited (Portaria SPA/MF 615/2024 art. 3). From 25 Sept 2026 no betting payments except wind-down (MP 1.394 art. 14).	Deposits only from a pre-registered account in the bettor's name (max three; others returned); prizes and withdrawals to that account in 120 minutes, hold only on fraud suspicion; CPF-keyed. Bolsa Família/BPC beneficiaries barred; SIGAP checks at registration, first daily login, every 15 days (IN 22/2025). No deposits from 25 Sept 2026, sites off 5 Oct, refunds in 7 days (MP 1.394 arts 7-9).	Suspicion-based reports to COAF through Siscoaf (segment 'SPA - Apostas de quota fixa', from 1 Jan 2025); no fixed R$ threshold; report by the next business day after the analysis; annual nil declaration to the SPA via SIGAP (Portaria SPA/MF 1.143/2024 arts 27, 30). AML duties survive the extinction of authorisations (MP 1.394 art. 10).	Bettor funds in transactional accounts; statutory separate estate (Lei 14.790 art. 22) revoked 25 Sept 2026; refund funds stay segregated in those accounts (MP 1.394 art. 8); aggregate balance equal to balances plus open bets (Portaria 615 art. 4 §3); operator gains moved to its own account within 120 minutes; R$5m reserve in federal bonds, R$30m minimum capital (Portaria 827/2024 art. 11).	SIGAP (Portaria SPA/MF 722/2024 art. 10; Manual rev. 03, 13 Nov 2025): six XML files per XSD, signed with e-CNPJ, daily by 06:00 at D+2, monthly file by the 5th, basic and cross-validation, 3 MB or 7,500 records per file. Continues after extinction (MP 1.394 art. 11; Portaria 3.005/2026 arts 3-5: balances at 5 Oct 2026 sent by 7 Oct, remaining duties by 15 Dec 2026). Retention 5 years.
Argentina — provincial regulators (e.g. IPLyC Buenos Aires, LOTBA, Mendoza); UIF	Peso accounts; deposits only from the player's own verified accounts, no cash and no third parties (Buenos Aires Province). Virtual assets not permitted in practice.	Withdrawals to the account used to deposit; payout instruction within 48 hours (Buenos Aires Province).	Monthly systematic report on prize payments from 15 minimum wages; suspicious reports within 15 days of concluding suspicion and no later than 150 days after the operation.	Not uniform across provinces.	Regulator access to operator systems (e.g. Buenos Aires Province); more than 15 jurisdictions and no common data standard. Retention 10 years.
Colombia — Coljuegos	Pesos only; bank accounts, cards, gateways and prepaid cards from supervised entities; foreign and virtual currencies banned. 19% VAT on deposits ended 2025; 2026 VAT annulled; 16% GGR tax for 2026, under court review.	Only the identified player can withdraw; payout ordered within 72 hours; at most 3 withdrawals a day; at least 50% of deposits wagered before a withdrawal.	Identification from COP 5 million a day; monthly SIREL reports to the UIAF within 10 days: transactions from COP 5 million and monthly totals from COP 15 million; suspicious reports immediately.	Colombian bank account covering withdrawable balances; guarantee for prizes.	Onshore inspection system recording every transaction, as XML to the regulator's schema. AML 5 years.
Peru — MINCETUR	Cash, cards and other means; virtual assets expressly excluded.	Payout by the player's chosen method or to an account in their name at a supervised entity; bank transfers within 3 business days.	Operations register from US$2,500; suspicious reports to UIF-Perú within 24 hours.	Guarantee of 600 UIT or 3% of net income, whichever is higher.	Laboratory-certified platforms; data to the MINCETUR data centre. 5 years, or the tax limitation period if longer.
Mexico — SEGOB	Internet bets need bank confirmation; cash for tickets and prizes banned from 3,210 UMA; virtual assets not addressed. SEGOB's draft to replace the 1947 law awaits Security Cabinet review (September 2026).	Remote bets record the bettor's account number and identity.	Identification from 325 UMA; notices to the UIF from 645 UMA by the 17th of the following month, via the SAT portal; 24-hour notices for suspicious cases (new rules from 30 November 2026). UMA 2026: MXN 117.31.	Bond covering about 60 days of prizes.	Real-time access for the tax authority (SAT) through an authorised provider; daily XML with the payment method. Retention 10 years.

Jurisdiction	Rails and virtual assets	Ownership, closed loop, payouts	Thresholds and reports	Player funds	Reporting and retention
Chile — Superintendencia de Casinos de Juego	Online law pending: bill 14.838-03 passed the Senate in general (August 2025) and remains in committee (October 2026). It limits payment means to those authorised by the financial regulator; banks must block unlicensed sites.	No betting without funds in the account; payment instruments in a minor's name barred (bill).	Casinos (UAF Circular 63, from 1 October 2026): due diligence from US$3,000; half-yearly reports of cash operations above US$10,000; suspicious reports to the UAF as soon as possible. Bill extends UAF duties online.	Liquidity reserve before operating (bill).	Remote access to platform systems for the regulator and tax authority (SII); technical standards (bill). Casino AML records 5 years.
Paraguay — CONAJZAR (Comisión Nacional de Juegos de Azar), since Ley 7438/2025 a deconcentrated body of the tax authority DNIT with functional and administrative autonomy (Ley 1016/1997 art. 4 as amended); Decreto 3846/2025 creates DNIT's Dirección General de Juegos de Azar; SEPRELAD (financial intelligence unit, Ley 1015/97); gaming operators are obliged subjects (Ley 1015/97 art. 13 j).	Ley 1016/1997 as amended by Ley 7438/2025 lists casino online and sports betting (up to 3 concessions) among games awarded by public tender (art. 20); sports betting: one exclusive concessionaire, Daruma SAM S.A. (APOSTA.LA); online casino under CONAJZAR authorisations (Res. 1/2019). CONAJZAR monitors and may block online channels, payment included (art. 6 bis). Payment rules, crypto not found.	Identity document required from every client to take part and transact, whatever the modality, with online gaming in scope (Res. SEPRELAD 258/2020 arts 1, 24). Own-name account rule not found. Prizes claimed within 60 working days of the draw; unclaimed prizes to the FONARESS account within 30 working days, no format exempt (art. 19, Ley 7438/2025).	FIU: SEPRELAD; reports via SIRO (gaming sector on SIRO, 2FA from 1 July 2025). Res. SEPRELAD 258/2020: due diligence from 8 minimum wages on bets, chip or credit purchases, prize collection (art. 26); suspicious reports within 24 hours of classification (art. 41); nil report within 10 working days after a quarter without one (art. 45). No fixed-amount report found.	Player-funds segregation or protection rule not found (Ley 1016/1997 as amended, Decreto 3846/2025, Res. SEPRELAD 258/2020, CONAJZAR pages searched). Concession guarantees exist (bid bond for the whole concession, canon guarantee deposit; Ley 1016/1997 arts 9, 14, text not opened) but secure state revenue, not players.	Machines and systems homologated by DNIT, connected online or in real time to CONAJZAR where applicable, certified by an ONA-accredited inspection body independent of gaming (Decreto 3846/2025 art. 5, text not opened); CONAJZAR laboratory register (Res. 70/2014: GLI, BMM, SIQ). AML records 5 years (Res. 258/2020 arts 28, 40).
Panama — Junta de Control de Juegos	US dollar settlement; online payment rules not found. Law 527 of 2026 lets the JCJ order internet providers to block unlicensed sites, apps and IP addresses.	Biometric identity and age verification on online platforms; voluntary spending and time limits (Law 527 of 2026, regulations due within six months).	Cash and quasi-cash transactions from US$10,000 declared to the UAF; suspicious reports to the UAF immediately on detection (Law 23 of 2015, art. 54, as amended in 2019).	Bond or deposit guaranteeing payment of prizes (to be confirmed).	Electronic audit system announced; annual JCJ audits of operators (Law 527 of 2026). AML records 5 years from the end of the relationship.
Canada — provincial (AGCO and iGaming Ontario; IGCO and British Columbia Lottery Corporation; AGLC Alberta); FINTRAC (federal)	Virtual assets not accepted (Ontario, Alberta, BC); deposits authorised by a financial services provider; no credit. Alberta opened 13 July 2026 under AGLC's Standards and Requirements for Internet Gaming; British Columbia: online gambling through BCLC's PlayNow.	Withdrawals only to an account the player legally holds; no transfers between players (Ontario). Alberta: geolocation blocking VPNs and proxies; source-of-funds corroboration where risk requires. British Columbia: player identity verified and deposits and withdraws only to player's account	FINTRAC reports from C$10,000 (large cash, large virtual currency, casino disbursement) within 24 hours; suspicious reports as soon as practicable; JSON API. Reporting entity: iGaming Ontario; BCLC; Alberta, AiGC oversees AML (to be confirmed). BC law requires source of funds and IGCO has regulations to mitigate ML.	Under iGaming Ontario's oversight (Ontario); annual agreed-upon procedures. Alberta not found. British Columbia: IGCO regulations prohibiting certain types of buy-ins (virtual currency, funds from money services businesses, and pre-paid cards)	Weekly revenue data to iGaming Ontario; FINTRAC copies to the AGCO. Alberta: financial reporting to AiGC; data outside Canada needs AGLC approval. BC: IGCO regulates BCLC. Reports of potential criminal activity, including ML, made to IGCO with reports retained for 5 years.
United States (New Jersey) — Division of Gaming Enforcement (Casino Control Act, C.5:12-95.17 et seq., P.L. 2013, c. 27; N.J.A.C. 13:69O); FinCEN (31 CFR 1021; casinos with gross annual gaming revenue over $1 million). Internet gaming only by Atlantic City casino licensees.	Patron deposit account, credit or debit card, cash or chips at an approved cashiering location, verified non-transferable prepaid card, ACH, promotional credits and winnings, other means the Division approves (13:69O-1.3(d)); gift cards and sports wagering kiosks added 2024-2025 (official text not opened). Virtual currency and stablecoins not listed; no Division approval found.	One account per patron per Internet gaming intermediary, non-transferable; no transfers between patrons; wagers only up to funds on deposit (C.5:12-95.23). Withdrawals: cash-out at the cage, transfer to the patron's deposit account, verified prepaid card or bank account verified with the bank, other means the Division approves; card deposits refunded to the funding card first (13:69O-1.3).	Currency transaction report for cash in or cash out over $10,000 aggregated per gaming day, filed within 15 days; suspicious activity report from $5,000 within 30 days of detection (60 at most); both to FinCEN by BSA E-Filing (31 CFR 1021.311, 1021.313, 1021.320, 1010.306). No separate state threshold report found (13:69D searched in full; 13:69O-1.9 system reports only).	Bank account securing patron Internet gaming funds, FDIC-insured bank with a physical presence in New Jersey unless the Division allows otherwise; balance at least the daily ending cashable balances, funds on game and pending withdrawals; monthly schedule to the Division's Revenue Certification Unit (13:69O-1.3(k), 2024 text; official copy not opened, DGE copy still says 'monthly attestation').	Division queries and exports all gaming system data in the format it requires (13:69O-1.8(b)); primary gaming equipment in Atlantic City (13:69O-1.2(n); C.5:12-95.20). Game play and account data 10 years (13:69O-1.8(d)); other casino records 5 years (13:69D-1.8(g)); BSA records 5 years (31 CFR 1010.430(d)). Tribal gaming: none found in New Jersey (NIGC state list not opened).

Annex C. Example records

Synthetic records with illustrative values, abbreviated. They show the shape of the data and are not drawn from any operator.

Card deposit (R3), with holder match and limit check:

```
{"tx_id":"D-2026-104511","player_ref":"P-20931","player_ref_scope":"licence-
A","direction":"deposit","rail":"card","instrument_id":"I-77812","provider_id":"PSP-03","rail_reference_type

,"prepared_by":"finance_ops","reviewed_by":"compliance_officer"}
```

Annex D. Conformance declaration (template)

For signature by the operator's responsible officer.

Item	Entry
Operator and licence(s)	
Profile(s) applied, with versions	
Reporting period	
Records start date	The date from which complete records exist; earlier periods reported as not_recorded
Rails in use	card / bank_transfer / emoney / mobile_money / voucher / cash / virtual_asset
Custody models in use	direct / omnibus_at_provider / hybrid, per location type
Where the records are held	System location, and the arrangement relied upon for any data-location rule
Declared conformance level	Level 1 / Level 2 / Level 3
Record types produced	R1–R12, or the subset applicable, with reasons
Check providers and registers used	

Item	Entry
Conformance suite version tested against	
Exceptions open at period end, and the oldest open exception	
Responsible officer, signature and date	

Annex E. Glossary

Term	Meaning in this Standard
Rail	A payment system class: card, bank transfer and instant payment, e-money, mobile money, voucher, cash or virtual asset.
Instrument	A specific means of payment on a rail that is linked to a player: a card, an account, a phone number, a voucher or a wallet address.
Funds location	Any account, balance, wallet or float in which the operator holds money.
Profile	A set of parameters, in the machine-readable structure defined by the schema (Annex A), that applies one jurisdiction's rules to the record model.
Closed loop	The rule that a payout returns to the instrument, or to an instrument of the same holder, from which the player funded the account.
Coverage	The relationship between total player liabilities and the funds held to meet them.
Rail reference	The identifier a payment rail issues for a payment.
Authority reference	The identifier an authority's own system issues for a transaction.
Unexplained delta	The residual difference after matching a ledger against an external statement.
Evidence pack	The set of records that shows one payment end to end.
Conformance suite	The versioned catalogue of validation rules, tolerances and severities against which a package is tested.
Central register or hub	A system run by or for an authority that is queried before money moves (a limit file, an exclusion register) or through which transactions must pass.
Data vault	A store of operator records held in the authority's schema, from which the authority reads or pulls data.
Indexed unit	A threshold expressed in a unit whose money value changes over time, such as a minimum wage or an inflation-indexed unit.

Annex F. Differences from the Curaçao edition

Area	Curaçao edition (September 2026)	This edition
Name	Crypto Transaction Reporting and Evidence Standard	Common Transaction Reporting and Evidence Standard; the short name CTRES is kept
Scope	Virtual assets only	Every payment rail, through rail modules (§6)
Jurisdiction	One, with its rules written into the text	Any, through profiles (§5); sixty-seven profiles researched from published sources (Annex B)
R1	Wallet Inventory	Funds Location: any location type, protection mechanism, location jurisdiction
R2	Player Wallet Link	Payment Instrument Link: holder match, funding type including invoice and buy-now-pay-later, issuer country, national-ID match, payout status
R3, R4	On-chain fields at the core	Rail-neutral core; rail and authority references; tax lines; limit check; payout timing; closed-loop evidence
R5	Screening Decision	Check Decision: fifteen check types, including central limit files, credit registers, eligibility and exclusion registers, biometric checks and financial risk
R7	Wallet reconciliation	Location statements and a coverage statement for player liabilities
R10, R11	Counterparty register; custody attestation	Provider register for any provider role; provider attestation for any pooled arrangement
R12	—	New: references to reports filed with other authorities,

Area	Curaçao edition (September 2026)	This edition
		without their content
New sections	—	Jurisdiction profiles (§5), rail modules (§6), mapping to existing formats (§7), governance (§13)
R3, R4 currencies	Account currency, account rate and operator-side network cost added in the September revisions	Kept, for every rail
Cadence	The periodic package was aligned to one jurisdiction's semi-annual reporting dates	Cadence is set by each profile

End of draft. Corrections to any profile are especially welcome: the Standard is only as good as the authorities' reading of it.
