Annex B of the Common Transaction Reporting and Evidence Standard (CTRES v1.1) — edition of 5 November 2026

Item	Detail
Edition	5 November 2026 — ninety-seven jurisdictions, in four regions
Standard	CTRES v1.1, universal edition (5 November 2026) — https://ctres.org/standard/. Register editions are dated and change as profiles are added or corrected, without changing the version of the Standard (§13).
Status	Published. Profiles are read from published sources and re-verified against the primary instruments, summarised to the parameters of §5 of the Standard, and offered to each authority for review. A profile reviewed with its authority carries the authority's own wording; corrections an authority makes to its own profile are adopted as submitted. The Register is a reference, not legal advice. "Not found" means that no published rule was located, not that none exists.
Structure	Part 1 — payments, player funds and reporting: rails and virtual assets; ownership, closed loop and payouts; thresholds and reports; player funds; reporting and retention. Part 2 — revenue and levy: the levy base and rate, bonus and open-bet rules, period and deadline, and the form or system through which the operator files. Part 3 — submission and streams: the submission mode the published rules imply, its cadence or latency, the central system, gateway or data vault where one exists and whether it receives bet-level data, and the transport (§8.4). Principal sources follow Part 3.

Part 3. Submission and streams

Part 3 gives, for each jurisdiction, the submission mode the published rules imply — periodic returns or files, a continuous feed to a central system, or both — with the cadence or latency stated, the central system, gateway or data vault by name where one exists and whether it receives bet-level data (the Wagering module, R15) or payments and accounts only, and the transport implied: push to the authority's system, pull from an operator-hosted vault, the authority's own protocol, or a form or portal. The vocabulary is that of §5 and §8.4 of the Standard; the profile parameters mode, latency, checkpoint, bet_level and transport are read from this part.

Jurisdiction	Submission and streams
Europe	
United Kingdom	Periodic only: quarterly regulatory return within 28 days of quarter end (LCCP 15.3.1) and key-event notices within 5 working days (LCCP 15.2.1), filed as returns to the Commission; no central system, data vault or stream published.
Ireland	Periodic only: compliance reports at the intervals the Authority sets by written notice, due within 14 days of the notice (Gambling Regulation Act 2024 s. 188); no central system, data vault or stream published.
Gibraltar	Periodic only: periodic regulatory returns on the licence holder's operations (quarterly statistical and financial) and an annual AML data survey to the Gambling Commissioner; customer account transactions kept in an operator-held system audit log (Remote Technical and Operating Standards). No central system or stream published.
Isle of Man	Periodic only: quarterly return to the GSC by the 21st after quarter end (player fund cover, SARs, deposits and withdrawals by fiat, VC and VG); no central system, data vault or stream published.
Alderney	Periodic only: monthly report by the 20th in the Schedule 17 format and quarterly report within 30 days of each financial quarter to the Commission (eGambling Regulations); no central system or stream published.
Jersey	Periodic only: Regulatory Return on the cadence the Commission sets, monthly or quarterly, within one calendar month of the reporting date (Policy Statement for Remote Gambling Operators, October 2025); no central system or stream published.
Malta	Both: a live or real-time mirror server of essential regulatory data kept readily accessible to the Authority at all times, physically where applicable (Directive 3 of 2018 art. 17(4); pull), plus the monthly player-funds report within 20 days, half-yearly management accounts and audited statements within 180 days (arts 39–41). Bet-level content of the mirror not specified.
Italy	Continuous, the authority's own protocol: each game session is opened by a message to ADM's central system, which validates it with a unique code before play (PGDA § 5.4.3); each deposit or withdrawal is recorded in the gaming-account register SACG before the account moves (PACG 3.3); messages signed; game-phase details of fixed-odds chance games and card games daily (§ 5.5). Bet-level: yes. Push.
Greece	Continuous: games run only on systems connected to the HGC supervision system through the operator's certified intermediate control system, which keeps the collected data continuously available (Decision 79835/2020 art. 33); the operator's Safe is certified every six months and read on access (pull). Bet-level: yes, every game. Transport: the authority's own protocol.
Cyprus	Both: a backup server in Cyprus connected in parallel to the central server, holding the data the National Betting Authority specifies, with real-time access for the Authority (Directive 03.2020; pull), plus a quarterly AML return and the annual report (Directive 15.2024). Bet-level: the betting system's data as the Authority specifies.
Portugal	Both: one XML file per hour and per data category (account transactions, game activity and the rest), zipped daily into the operator's Safe by 04:00 for collection by the SRIJ control infrastructure (Regulamento 903-B/2015 annex, as amended; pull), the technical system open to the SRIJ at all times (RJO art. 34); monthly activity reports by the 15th (art. 34(e)). Bet-level: yes, hourly game files.
Spain	Both: signed XML batches to the Sistema de Control Interno's capturador and almacén (data warehouse) in the EU, read by the DGOJ (pull) — game records in real time, account files daily, the operator account with GGR per game type monthly (RD 1613/2011 art. 13; DGOJ data model 2024, XSD 3.3). Bet-level: yes, game records.
France	Continuous archive: the operator's support matériel d'archivage captures all data exchanged between player and platform as the operations happen, on a frontal in metropolitan France with a certified data safe, with ANJ access in real time over 12 rolling months (Décision 2022-219, ET5; pull). Bet-level: yes. Periodic returns: not in the instruments opened.
Netherlands	Both: raw data written to the operator-hosted controle databank (CDB) in the Netherlands at the moment they are generated, in the Ksa's XML schema, with electronic access for the supervisor at all times (Besluit kansspelen op afstand arts 4.12, 4.42, 5.3; pull), plus yearly reports to the Ksa board (art. 4.18). Bet-level: yes.
Belgium	Continuous: a permanent data link between the website and the Gaming Commission (Royal Decree of 21 June 2011 art. 2), the servers managing the data in a permanent establishment in Belgium (Gaming Act art. 43/8 § 2); content, latency and bet-level scope not specified. Periodic returns: not in the instruments opened.
Germany	Both: LUGAS limit file and activity file checked before each deposit and each play session (GlüStV 2021 §§ 6c, 6h; the authority's own protocol, real time), and an operator-run Safe-Server holding all supervision data immutably, with real-time interfaces and direct GGL access at any time (§ 6i(2); pull). Bet-level: yes, all game events. Format in an unpublished guideline.
Austria	Both, land-based: gaming machines linked electronically to the Bundesrechenzentrum GmbH (GSpG § 12a Abs 4; continuous, machine-level), audited accounts to the Finanzamt Österreich within 6 months (§ 19 Abs 4). Online: Safe-Server at operator cost with Sperr- and Limitregister under Bill 594 d.B. from 1 January 2027 (§§ 31g–31i), not yet in force.

Jurisdiction	Submission and streams
Switzerland	Periodic only: annual business report and annual report on player-protection measures to the competent authority, ESBK or Gespa (BGS arts 47(1), 84); no state gateway, data vault or stream published.
Liechtenstein	Periodic: monthly statement of gross gaming revenue, quarterly levy return and annual report with accounts to the Amt für Volkswirtschaft and the FMA (GSG; GSV); every game permanently connected to the operator's certified electronic control system (EKS), whose unaltered raw data are shown on request (pull on request). No state gateway or stream.
Denmark	Continuous to the operator's own SAFE data vault: game data stored as XML to the authority's XSDs and zipped per tamper token, a token issued daily by Spillemyndigheden, which transfers data from the SAFE to its own store as needed (BEK 682/2025 and 684/2025, Annex 1; pull). Bet-level: yes, spildata. Daily checkpoint by token.
Sweden	Periodic only: half-yearly responsible-gambling statistics to Spelinspektionen; the gaming system in Sweden or, where allowed, abroad with remote access for the authority (Spellag 16 kap. 2 §); no data vault, central system or stream published.
Norway	Periodic returns only; no central system or stream published.
Finland	Periodic: game and account data delivered to the authority and kept 5 years under Rahapelilaki s. 45 (from 1 July 2027); cadence, format and transport not set in the Act; no central system or stream published.
Estonia	Continuous by query (pull): the operator's electronic recording and control system (EAKS) must let the Tax and Customs Board run queries on it, and the Board draws gambling data over the X-tee data-exchange layer through the EHMA services (Gambling Act § 58; EHMA specification v2.1); data list in Minister of Finance Regulation 26. Bet-level: game data as listed.
Latvia	Both: gaming machines operated only when networked to the State Revenue Service's unified control and monitoring system with online data exchange (Gambling and Lotteries Law; continuous, machine-level); quarterly statement within 15 days through the Electronic Declaration System (portal); unimpeded remote access for the VID to interactive gaming platforms (pull).
Lithuania	Both: the remote gaming platform records and transmits the data specified in the Law to the authority's LAKIS at least every 30 days (art. 16-1; push, batch); the platform keeps player and transaction records centrally and directly accessible to the authority (art. 16(9); pull). Bet-level: the data the Law specifies.
Romania	Both: online player, game and financial-transaction data stored on a safety server at ONJN or a licensed data centre, unalterable by the operator, with daily and monthly summaries sent to a mirror server for real-time verification (HG 111/2016 arts 2, 127; push); land: slot and betting systems linked to an ONJN terminal with daily stakes and prizes (art. 15(2)(f)). Bet-level: yes.
Bulgaria	Continuous: the operator's central computer system registers every transaction online in the National Revenue Agency's system and sends to the NRA server, in real time, the concurrent game sessions, each participant's stake and each winning paid (Gambling Act art. 6(1)(4); push). Bet-level: yes.
Hungary	Periodic: no reporting cadence found in the instruments opened; the operator's server gives the authority constant remote back-office access (pull); no central system or stream published.
Poland	Both: all data on internet games archived in real time in an archiving device in Poland, the EU or the EEA with remote access for the National Revenue Administration (Gambling Act art. 15b(3)–(4); pull), plus quarterly data by the 21st (art. 79). Bet-level: yes, all game data.
Czech Republic	Both: daily game reporting and a daily game log as automated outputs, with remote access provided three times per calendar day for 8-hour periods, to the locally competent customs office (vyhláška 10/2019 Sb. §§ 7–8; Act 186/2016 §§ 13a, 108c; pull). Bet-level: yes, the game log. Latency up to 8 hours.
Slovakia	Both: free online access for the regulator to the operator's server, which must be in Slovakia (Act 30/2019 § 14(21)–(22); pull), plus daily notices of stakes and winnings for internet games and monthly notices for some lotteries (§ 74; Decree 134/2019). Bet-level: aggregates in the notices; game data through server access.
Serbia	Both: online games run only on a system exchanging data electronically with the Administration's software for real-time supervision, machines and betting desks included (Games of Chance Act arts 10, 95, 115; API, push), the Administration also having access to the operator's databases or a mirror in Serbia (pull); monthly payment-channel form EMU/I by the 5th via its web service. Bet-level: yes.
Croatia	Continuous, the Ministry's own protocol: online casino games only by an operator directly connected to the Ministry of Finance information system, exchanging supervision messages under its technical specification TS1 (Games of Chance Act art. 62; rulebook art. 3(2)); betting and machine operators give the Ministry a direct real-time connection to their systems (arts 53, 62). Bet-level: yes.
Bosnia and Herzegovina	Both: Federation online systems keep a direct on-line link between the operator's central server and the Tax Administration's central office server, where all online data and transactions are recorded as one separate payment point (Pravilnik arts 6, 17; continuous, bet-level yes); Republika Srpska: real-time access for the authority and a monthly fee return by the 15th.
Montenegro	Continuous: every payment received, payout and win recorded in real time in the operator's tamper-proof supervision system and delivered to the gaming administration at intervals of 10 minutes at most, kept in its information system (Games of Chance Act 2025 art. 27; push). Bet-level: wins and payouts; latency 10 minutes.
North Macedonia	Both: electronic and internet games run through the operator's supervisory information system (NIS) linked to the Public Revenue Office's system, exchanging data as the Minister of Finance prescribes (Law on Games of Chance 2026; continuous, bet-level yes), plus a monthly return to the Public Revenue Office and the Ministry of Finance by the 5th.
Kosovo	Games of chance prohibited (Law 06/L-155); no submission regime published.

Jurisdiction	Submission and streams
Eurasia, Middle East, Asia and Pacific	
Ukraine	Continuous, the state's own protocol: every stake, refund and payout in each game is recorded in the operator's online system and passed in real time to the State Online Monitoring System, which receives, processes and stores it (Law 768-IX arts 13, 15(7); push); in pilot, 12 operators connected by April 2026, second phase due end 2026. Bet-level: yes, with unique identifiers.
Georgia	Continuous: casino, slot hall, totalizator and online licence holders are controlled through the Revenue Service's electronic control system of the gambling business, run by a selected contractor with its server in Georgia; each totalizator ticket is recorded through a POS terminal (Law on gambling arts 3, 36¹). Bet-level: yes, tickets. Transport: the system's own protocol.
Armenia	Both: monthly financial-flow reports by casino, gaming and internet gaming organisers to the State Revenue Committee by the 20th of the following month (Decisions 451-N, 1355-N, 1343-N; batch); a central real-time platform for wagers, deposits and losses from January 2027 (bet-level, push) under the new framework.
Azerbaijan	Periodic: daily transfer of lottery, sports betting and electronic betting ticket sales and sellers' fees from operators' systems to the information system of the state body the government designates (Law on lotteries art. 16.1.11–12; batch, daily); no real-time stream published.
Belarus	Both: continuous real-time recording of every stake, payment and payout in the SKKS, the special computer cash system of the Monitoring Centre, with round-the-clock access for the tax and state control bodies (Decree 226; SKKS Regulation §§ 2, 4.1, 27.11, 29.9; push, the system's own protocol; bet-level yes), plus half-yearly and annual reports to the Ministry of Taxes and Duties by 1 August and 1 March (Resolution 764 § 34).
Kazakhstan	Continuous: bookmakers and totalisators may accept bets and pay winnings only with hardware and software integrated with the Unified Accounting System, which automatically receives, registers, processes and stores each bet (Law on gambling arts 12-1(5), 12-2(6); live 5 March 2026). Bet-level: yes. Transport: the system's own protocol.
Uzbekistan	Continuous: operators integrate their platforms with the Unified State Register of Bets and Players, which records every transaction — deposits through its clearing-house account, bets, results, returns and payouts — with bets sent in near real time (Regulation §§ 8, 10, 39, 44; push). Bet-level: yes.
United Arab Emirates	Periodic returns only; no central system or stream published (a Unified Player Database across licensees is in development).
